

Industry Type	Industry Specific	Work Description
Administration		
	Office	
		Photocopying
	End of Industry Specific: Office	
End of Industry Type: Administration		
All Industry Types		
	All Trades	
		Accept load to vehicle from forklift (3rd Party operator) and Loading by hand
		Acceptance of delivery to site for materials
		Charging of Li-Ion batteries for use with cordless tools
		Connect hose to existing water supply tap
		Cutting material with a box cutter/ utility knife/ snap blade knife/ sharp tool
		Driving in and out of carparks and on customer premises
		Driving in and out of carparks and on customer premises
		Electrical Safety
		Inspect and drive passenger/ light commercial vehicle
		Listening to music while working
		Monitoring and review of JHA
		Monitoring and Review of SWMS
		Safety inspection and use of Forklift
		Site orientation of domestic residence
		Site Orientation/ Induction
		Sweeping Floor or ground
		Unloading of shipping container with forklift and by hand
		Vacuum
		Working in an area with the risk of Coronavirus, Covid-19, Influenza or similar
		Working in Cold Conditions
		Working in High Wind Conditions
		Working in hot conditions
		Working in the rain
		Working outdoors in hot conditions
		Write up incident report
	End of Industry Specific: All Trades	
End of Industry Type: All Industry Types		
Automotive and Plant		
	Mechanical	
		Inspection and use of Four Post Vehicle Hoist
		Inspection and use of Two Post Vehicle Hoist
		on site Servicing to diesel powered vehicle
		Replace diesel fuel filters
		Replace fuel filters
		Replace petrol fuel filters

Safety inspection and use of TTL Hydraulic Torque Wrench and hydraulic pump

Safety inspection and use of TTS Hydraulic Torque Wrench and hydraulic pump

Safety inspection and use of TTX Hydraulic Torque Wrench and hydraulic pump

Servicing to vehicle in workshop

End of Industry Specific: Mechanical

Servicing

Change Spark Plugs

Check batteries and charging system

Check system for gas leaks

Grease moving parts and greaseable joints

Inspect/ Repair skirts and scrubber or sweeping brushes

Inspection and use of a gasoline powered air compressor

Inspection and use of petrol powered air compressor

Jack up vehicle/machine

On site Servicing to gasoline powered vehicle

on site Servicing to petrol powered vehicle

Open engine cover/ bonnet/ service compartment

Remove and replace wheels using a pneumatic rattle gun

Replace air filter

Replace brake pads using a pneumatic rattle gun

Replace engine oil and filters

Replace hydraulic hose

Replace hydraulic oil and filters

Replace radiator coolant

servicing a ride on electric sweeper (Complete Job)

servicing a walk gas operated behind sweeper/scrubber (Complete Job)

Servicing to hybrid industrial automatic ride on sweeper/scrubber

Servicing to hybrid industrial automatic ride on sweeper/scrubber (Complete job)

Tune engine

End of Industry Specific: Servicing

End of Industry Type: Automotive and Plant

Cleaning

All Cleaning industries

Carpet Cleaning

Inspection and use of electric high pressure water sprayer

Inspection and use of gasoline powered blower/ vacuum

Inspection and use of gasoline powered high pressure water sprayer

Inspection and use of petrol powered blower/ vacuum

End of Industry Specific: All Cleaning industries

Commercial Cleaning

Clean bathroom

Clean Glass shower screen with a cloth

Clean Glass with a cloth

Clean mirror with a cloth

Clean Window Using Pure Water Technology

Clean Windows Using rope Access

Clean Windows with mop and squeegee

Cleaning of hard surfaces

Cleaning of office and showroom
Cleaning of residence
Cleaning of Rest Rooms / Toilets
Gain access to work are using Rope Access
Inspection and use of Carpet Extractor
Inspection and use of High-Speed Propane (LPG) Powered Floor Buffer (Burnisher)
Inspection and use of Low-Speed Electric Floor Buffer
Inspection and use of planetary floor polisher
Inspection and use of walk behind battery powered floor scrubber
Remove bag from bins and waste paper baskets
Steam cleaning of tiles

End of Industry Specific: Commercial Cleaning

Domestic Cleaning

Mopping Floor

End of Industry Specific: Domestic Cleaning

End of Industry Type: Cleaning

Construction

Air Conditioning and Refrigeration

Access ceiling space via Ladder
Core hole through masonry wall with a battery powered rotary hammer drill
Cut aluminium angles using a hacksaw and mitre box
Cut copper pipe with tube cutter
Cut hole into existing plasterboard ceiling using a key hole plasterboard saw
Cut Steel/ Unistrut with drop saw
Disconnect pipework form existing plant
Filling & testing of pipework
Fit Pipe insulation over pipes
Fit Unistrut brackets onto masonry wall
Fix aluminium channels to existing slab using battery powered hammer drill
Hang condensing unit onto masonry wall
Hang Fan cooler unit inside cool room
Install ceiling registers
Install flexi ductwork and zone motors in ceiling space
Install insulated ceiling panels to cool room
Install new wall mounted unit
Install TX Valve
Installation of Cool Room
Installation of ducted system air conditioner
Installation of new refrigeration System to new supermarket (complete job)
Installation of new refrigeration to coolroom (complete job)
Installation of refrigeration system to cool room
Installation of support angles or channels to hanging rods
Installation of threaded rod hanging bars
Installation of underfloor refrigeration pipework
Installation of wall hung split system air conditioner
Mixing Polyurethane Isocyanate in a bucket using an electric drill
Mount condensing unit onto preinstalled Unistrut brackets
Place copper pipes into trench ducting

Pour Polyurethane Isocyanate into pipe duct
Pressure testing of pipework with nitrogen and charge with refrigerant (HCFC)
Reclaim refrigerant gas from existing system
Refrigerant charge the system using a vacuum pump
Remove existing wall mounted unit
Replacement of ducted system air conditioner
Replacement of wall hung split system air conditioner
Run connecting copper pipework and fit off
Run Pipe work through existing ceiling space
Secure pipework to structure with saddles
Silver solder copper pipes together
Stand up cool room panels and fit into bottom track

End of Industry Specific: Air Conditioning and Refrigeration

All Trades

Acceptance of delivery to site for materials via Crane Truck
Access roof via an extension ladder
Access roof via Boom Lift
Access roof via fixed access ladder
Access roof via Ladder
Access Roof via scaffold stair access
Access roof via Scissor Lift
Access work area using a platform ladder
Access work area using a step ladder
Access work area using 'Hop-Up' trestle ladder/ work platform
Access work area via a mobile scaffold
Access work area via a scaffold/ working at heights from a scaffold
Apply touch up paint
Carrying materials from storage area to work area
Claim Work Area
Cleaning up work area
Core through masonry surface with an electric core drill
Cut materials using an electric mitre saw
Cut steel using a battery powered angle grinder
Cut Steel using an Angle Grinder
Cut strapping off around pack of materials
Drill hole into masonry surface with a battery powered rotary hammer drill
Drill hole into masonry surface with an electric rotary hammer drill
Drill hole using a Battery Powered Drill
Drill hole using an electric drill
Erection and use of mobile scaffold
High Risk Construction Work covered in this SWMS
Inform facilities / operations and security personnel of work location(s)
Inspect and drive passenger/ light commercial vehicle on or off site
Inspection and use of Generator
Inspection and use of petrol powered high pressure water sprayer
Install concrete screw anchor/bolts using a battery powered rattle gun
Install screws using a Battery Powered Drill
Install screws using a tek gun
Load materials/members into scissor lift

Loading Materials onto roof using an EWP
Loading materials onto truck using a crane and by hand
Marking Out Slab or Ground
Move materials using a trolley (sack Truck)
Moving materials around on a trolley
Push Wheel Barrow on site
Refuelling of machinery
Repeat the above process steps until completion of task
Safety Check And Use Of Boom Lift (extended version)
Safety Check And Use Of Scissor Lift (Extended version)
Shoot nail into concrete with a cordless nailer
Site Emergency Response Procedure
Undertake Clients general all sites induction
Using an Angle Grinder
Using an Existing roof anchorpoint system
Welding with a portable Electric Welder
Working at height from a boom lift
Working at height from a scissor lift
Working at heights - Generally
Working at heights - Generally
Working in isolation
Working where there is movement of powered mobile plant

End of Industry Specific: All Trades

Bricklaying

Acid wash surface by hand
Bricklaying
Bricklaying to new project home
Carry blocks by hand
Carry bricks using a mechanical brick carrier (Clamps)
Cut bricks using a gasoline powered brick saw
Cut bricks using a petrol powered brick saw
Cut bricks using an angle grinder
Installation of Glass Blocks to existing opening
Installation of lintel by hand
Installation of viscourse
Load bricks onto scaffold by hand
Mixing cement with a portable petrol powered mixer
Mixing cement/ mortar with a portable gasoline powered mixer
Mixing cement/ mortar with a portable petrol powered mixer
Set up mortar boards
Set up Profolds to corners
Use of Brick/Materials hoist
Wash down brick wall

End of Industry Specific: Bricklaying

Carpentry

1st fix carpentry to new 2 story dwelling using a Pneumatic and Impulse Nail Gun
1st fix carpentry to new dwelling using a Pneumatic and Impulse Nail Gun
Apply construction adhesive using a calking gun
Create temporary work bench using trestles and planks

Cut fibre cement sheeting using electric shears
Cut fibre cement sheeting using hand operated mechanical shears
Cut Hebel/ Autoclaved Aerated Concrete with a diamond blade circular saw
Cut timber beading using a hand saw and mitre box
Cut timber using a battery powered circular saw
Cut timber using a battery powered reciprocating saw
Cut timber using a circular saw
Cut timber using a jigsaw
Cut timber using a reciprocating saw
Cut timber using an electric mitre saw
Cut wood beading using a hand saw and mitre box
Cut wood using a battery powered circular saw
Cut wood using a circular saw
Cut wood using an electric jigsaw
Cut wood using an electric mitre saw
Daily preoperational inspection of a Pneumatic (Air) Nail Gun
Daily preoperational inspection of an Impulse (gas) Nail Gun
Ease/ adjust existing doors
Fix fibre cement cladding sheet in place and nail by hand
Fix fibre cement soffit/ eaves sheet in place and nail by hand
Inspection and use of electric air compressor
Install "STRUCTAflor" particle board flooring
Install ceiling joist, Hanging beams, stabilisers, etc
Install Hebel Panel
Install plywood flooring
Install solid strip timber flooring (Secret Fix) to timber subfloor
Install solid strip wood flooring (Secret Fix) to wood subfloor
Install timber roof trusses by hand
Install trimmers/ noggings to wood framing
Install wood roof trusses by hand
Install wood wall linings using a battery powered drill
Installation of Doors and Door Hardware
Installation of eaves linings to new domestic residence
Installation of floor joist
Installation of Timber Purlins
Manufacture timber wall frames using a mitre saw and an Impulse (gas) Nail Gun
Manufacture timber wall frames using a mitre saw and Pneumatic (Air) Nail Gun
Mark out slab using a chalk line
Measure for cladding above roof
Measure perimeter of house
Nail timber using a pneumatic (Air) nail gun
Nail timber using an Impulse (gas) Nail Gun
Passing up Sheets and Accessories from the ground
Position floor boards together using a plank jack/ floor dog
Removal of existing doors
Set up trestle scaffold
Stand up wall frames

End of Industry Specific: Carpentry

Civil

Arrive at domestic site with truck and establish unloading area
 Arrive at domestic site with truck and trailer and establish unloading area
 Back Fill trench by hand with original spoil
 Back Fill trench using excavator with original spoil
 Back Fill trench using excavator with sand and rubble
 Clean street and footpath
 Compact area using a gasoline powered leg rammer
 Compact area using a gasoline powered vibrating plate
 Compact area using a petrol powered leg rammer
 Compact area using a petrol powered vibrating plate
 Compact area with Road roller (roller-compactor)
 Cutting Bitumen with a Quick Cut Diamond blade saw
 Daily preoperational inspection of a Pneumatic Jack Hammer
 Delivery and unloading of mobile plant
 Delivery, Safety Check And Use Of Dingo
 Dig Hole by hand
 Dig hole with power driven auger
 Dig Trench by hand
 Dig trench using a chain trencher
 Dumping/Unloading load on ground using a tip truck/ dump truck
 Inspect and drive Tip Truck/ Dump Truck
 Inspection and use of diesel powered air compressor
 Inspection and use of Grader/ Scraper
 Inspection and use of Motor Grader/ Road Grader
 Installation of Drag Box/ Trench Box Shoring using an excavator
 Installation of lintel using a skid steer loader
 Laying asphalt with paver which is filled from tipper
 Laying blue metal paver which is filled from tipper
 Lift member into place using an excavator
 Load skid steer loader onto trailer using aluminium ramps
 Load skid steer loader onto truck using aluminium ramps
 Mixing concrete with a portable mixer
 Move soil by hand using a shovel
 Operation of drilling rig and soil sampling
 Place rubble around domestic site using a skid steer loader
 Planning for wet weather and flooding events
 Raising Sewer/ Stormwater Pits and Valve covers in an existing bitumen roadway
 Remove and fit attachments on Excavator
 Remove and fit attachments on skid steer loader
 Remove rubbish and debris from domestic site using skid steer loader and truck
 Remove soil from domestic site using a skid steer loader and truck
 Remove spoil from auger using wheel barrow
 Safety check and operation of Excavator
 Safety check and operation of Excavator for trenching and excavations
 Safety inspection and use of skid steer loader
 Safety inspection and use of wheeled front end loader
 Set up and use laser level
 Shore trench by Installing Hydraulic Shoring (Soldier set style)
 Site environmental considerations

Site Set Out

Spread rubble around site using a skid steer loader

Spreading soil with Shovel and Rake

Tack coating (including use of hand lance) prior to laying asphalt

Unload skid steer excavator from trailer using aluminium ramps

Unload skid steer loader from trailer using aluminium ramps

Unload skid steer loader from truck using aluminium ramps

Using a pneumatic Jack Hammer/ pneumatic Breaker/ Demolition Hammer

End of Industry Specific: Civil

Cladding

Installation of Exsulite Facade Cladding and Texture Coating

End of Industry Specific: Cladding

Concreter and Concrete Repair

Abrasive blasting

Apply high strength repair mortar

Apply surface sealant material (Kahfill) to face of crack

Concrete and reinforcement repairs

Concrete crack repair and injection

Concrete Delivery and Pumping

Dig Hole by hand

Dig Trench by hand

Finishing concrete with gasoline powered trowel (Helicopter)

Finishing concrete with petrol powered trowel (Helicopter)

Injection of Nitofill LV epoxy resin

Inspection and use of Diesel-Powered Hydraulic Cementitious Products Mixer Pump

Install damp proof membrane (Forticon plastic)

Installation of Gypsum Concrete floor underlayment

Mixing concrete with a portable mixer

Place steel reinforcing mesh

Placing Concrete

Pouring Concrete

Pouring Concrete Slab using a pump and a helicopter

Spreading Gypsum Concrete with Rake/Screed

Water ingress repair using XYPEX

Working with silica and silica containing products

End of Industry Specific: Concreter and Concrete Repair

Demolition

Asbestos removal by hand and house demolition using an excavator

Clean up demolished materials using a shovel, rake, and wheelbarrow.

Cut masonry wall with a Quick Cut Diamond blade saw

Cut steel using a reciprocating saw

Cutting Concrete with a Quick Cut Diamond blade saw

Decontamination of Plant

Demolish masonry structure with an electric Demolition Robot

Demolish/ remove a wooden staircase by hand

Demolition of brick veneer iron roof house by hand

Demolition of brick veneer tiled roof house by hand

Demolition of brick wall by hand and jack hammer

Demolition of cupboards and built in robes

Demolition of existing Drywall lined partition stud wall

Demolition of existing flush jointed plasterboard ceiling

Demolition of existing plasterboard lined partition stud wall

Demolition/ removal of bathroom fixtures and fittings

Demolition/ Removal of existing carpet and undelay

Demolition/ removal of existing ceiling tiles

Demolition/ removal of existing Compactus shelving unit

Demolition/ Removal of existing insulated panel cool room/ freezer by hand

Demolition/ removal of existing joinery

Demolition/ Removal of existing pavers

Demolition/ removal of existing suspended exposed grid ceiling

Demolition/ removal of existing timber framing using a battery recipro saw

Demolition/ removal of existing timber framing using a petrol powered chainsaw

Demolition/ Removal of existing vinyl flooring

Demolition/ Removal of existing wall and floor tiles using an elec jack hammer

Demolition/ Removal of Glass Panes in Doors/ Windows

Demolition/ Removal of Glass Panes in French Doors/ Windows

Demolition/ Removal of glazed (Glass) aluminium partitions

Demolition/ Removal of metal wall cladding by hand from ground and scissor lift

Demolition/ Removal of roller door using a scissor lift and forklift

Demolition/ Removal of steel framing members by hand from EWP

Demolition/ Removal of steel staircase by hand from a scissor lift

Demolition/ Removal of timber planking by hand

Demolition/removal of glass from frame

Demolition/removal of items containing lead

Demolition/removal of items containing lead and lead dust to ceiling cavities

Demolition/removal of window glazing and aluminium frames

Don personal protective equipment (PPE) prior to asbestos removal

Enter asbestos removal area through the Decontamination Unit

Exit asbestos removal area through the Decontamination Unit

House demolition using an excavator

Inspection and use of a diesel walk-behind floor saw

Inspection and Use of a Gasoline-Powered Ring Saw to cut masonry surface

Inspection and Use of a Petrol-Powered concrete chainsaw

Inspection and Use of a Petrol-Powered Ring Saw to cut masonry surface

Inspection and Use of an electric masonry wall saw

Jimmy/ prise fixtures away from wall

Knock out bricks using a hammer

Lead based paint removal using Peel away Paint Removal System

Lining of the Truck with Plastic Lining

Lower materials to ground with ropes

Mould Remediation - Using chemical and vacuum

Part demolition of existing brick wall to form new opening

Passing down Roof Sheets and Accessories to the ground

Plan the demolition works and sequencing

Prepare to demolish/ remove existing mechanical services

Remediation of asbestos contaminated soil by hand and using general hand tools

Removal of asbestos adhesive from hard surface

Removal of Asbestos products

Removal of contaminated materials/ hazardous waste from site

Removal of demolished materials and waste from site

Removal of materials from roof by hand to ground

Removal/ demolition of existing suspended exposed grid ceiling

Remove asbestos clothing

Remove existing suspended ceiling tiles

Remove nuts using a battery powered rattle gun

Remove PPE/ Lead contaminated clothing

Remove screws using a battery powered drill

Removing friable asbestos by hand

Removing friable asbestos-contaminated soil by hand and using an excavator

Removing non friable asbestos by hand

Removing non friable asbestos by hand (Complete Job)

Removing non-friable asbestos-contaminated soil by hand and using an excavator

Safety check and operation of Excavator for demolition works

Safety Inspection and use of Hydraulic Rock Breaker

Safety Inspection and use of Hydraulic Shear attachment

Selection and Use of PPE

Spray PVA Glue with an electric airless sprayer

Using a portable electric conveyor

Using an electric Jack Hammer/ Electric Breaker/ Demolition Hammer

Vacuum ceiling cavities with a portable HEPA vacuum

End of Industry Specific: Demolition

Electrical

Connect new cables into electrical plant/ equipment

Connect new cables into existing switchboard

Dig Trench by hand

Disconnect electrical from existing plant

Electrical installation to new tenancy (Complete Job with scissor lift)

Fill out and issue Electrical Certificate of Compliance

Fit power outlet to drywall

Fit power point to plasterboard wall

Fit switch to drywall

Fit switch to plasterboard wall

Install Inverter

Install isolator

Install light fittings

Install Mounting brackets and rails to roof

Install solar panels onto the mounting frame

Installation of cable tray

Installation of Cable Tray Covers

Installation of catenary cable

Installation of Solar System to Domestic Dwelling

Isolate power to existing system

Replace existing light fittings

Replace Smoke Detector

Rewire in conduits between light fittings

Run Cables and secure to catenary cable

Run Cables through existing ceiling space

Secure conduits to structure with saddles

Test the electrical installation

Tracing and identifying existing live lighting circuits - for fault purposes

Work on or near energised electrical installations or services

Working in ceiling space

End of Industry Specific: Electrical

Fencing

Clip off wire to the posts using a battery powered clip gun

Cut existing wire ties and unfasten existing fencing wire/mesh from fence posts

Cut fence sheets with electric shears

Delivery and installation of temporary fencing

Drive in fence posts and droppers with a Backhoe & hydraulic vibrating hammer

Drive in fence posts and droppers with an Excavator & hydraulic vibrating hammer

Inspection and use of Fastfencer attachment to run out fencing wire/ mesh

Install chainmesh fencing

Install posts

Install star pickets using a hammer and Star Post Dropper

Installation of Panel fencing

Installation of post and rail metal clad fencing

Installation of temporary fencing

Mix concrete in a wheel barrow

Removal of temporary fencing

Screw fence sheets to rail using a battery powered drill

End of Industry Specific: Fencing

Fire Protection

Connect new cables into existing fire panel

Fit speakers and detectors to drywall ceiling

Fit speakers and detectors to plasterboard ceiling

Install suspended fire pipework to underside of concrete slab

Install suspended fire pipework to underside of roof purlins

Run Pipe work and cables through existing ceiling space

Thread pipe using a Portable Power Pipe Threader

Working in a confined space

End of Industry Specific: Fire Protection

Floor Finisher and Coverer

Inspection and use of Diamond Floor Grinder

Install Carpet and underlay to a concrete floor

Install Carpet and underlay to a timber floor

Install vinyl skirting

Install vinyl floors

End of Industry Specific: Floor Finisher and Coverer

Formworker

Install 'Bondek' or Similar formwork to structure Using an Explosive Power Tool

Install bearers and joists to formwork support frames

Install plywood formwork to support framing

Installation of formwork support frames

Installation of simple formwork

Stripping formply

Using an Explosive Power Tool

End of Industry Specific: Formworker

General Building

Accept load from vehicle with forklift (3rd Party operator) + unloading by hand
Another us
Apply epoxy floor coating
Apply Silicone / Liquid Nails / Construction adhesive
Brick and Blocklaying – Complete commercial job scaffold supplied by builder
Carrying materials and equipment (Manual Handling)
Claim Tenancy work area
Clean up site by hand using a wheel barrow to transfer debris to bin
Concrete filling of blockwork by bucket
Construction Site Establishment and Project Risk Assessment
Cut wood using a battery powered reciprocating saw
Cut wood using a reciprocating saw
Demolition/ Removal of steel structure using a crane
Inspection and use of a Non-slewing Telehandler
Install Acro prop
Install Carpet and underlay to a wood floor
Install Pull down attic ladder into drywall ceiling and wood framing
Installation of Structural Steel framed structure (Shed) using a crane and EWP
Installation of UPVC Conduit
Lift member into position using a duct/genie lifter
Operation of EPS Hot Melting Machine
Pre work inspection of Plant
Project Risk Assessment
Refurbishment of residence/ unit
Remove existing silicone
Welding with a portable TIG welder
Working in a commercial kitchen

End of Industry Specific: General Building

Glazier

Carrying Window frames from storage area to work area
Cut aluminium sections using an electric mitre saw
Install Aluminium deflection head and sub sill
Install glass into frame
Install window frames into deflection head and sub sill
Installation of Glazed aluminium partitions
Unload glass from vehicle onto trolley

End of Industry Specific: Glazier

Height Safety

Inspect and certify the anchor point installation
Inspect and certify the static line installation
Install anchor points into existing concrete slab
Install Horizontal Life line fixed to masonry wall
Install Horizontal Life line fixed to overhead concrete
Install Horizontal Life line fixed to overhead structural steel
Install Horizontal Life line surface mounted to metal roof sheeting
Install modular access ladder to structural wall girts behind wall cladding
Install modular access ladders to existing masonry wall

Install modular handrail to the top of insulated panel cool room
 Install Pull down attic ladder into drywall ceiling and steel framing
 Install Pull down attic ladder into plasterboard ceiling and steel framing
 Install Pull down attic ladder into plasterboard ceiling and timber framing
 Install Pull down attic ladder into suspended exposed grid ceiling
 Install rafter mounted anchor points to a tiled roof
 Install Rafter Mounted anchor points to tiled roof without edge protection
 Install roof access hatch into a metal roof
 Install Safety Anchors to an existing roof (wood from above and below)
 Install Surface Mounted anchor points to metal roof
 Install Surface Mounted anchor points to metal roof without edge protection
 Measure and mark out for system installation
 Run and Connect Static Line Cable
 Twin rope rescue via pick off and take to ground
 Using a Harness and Static Line

End of Industry Specific: Height Safety

Home Improvements

Build Steel Wall Frame and Bolt Wall Girths to Columns
 Build Wall Frame and Tek Screw Wall Girths to Columns
 Drill Wall Girths and Purlins with an electric drill
 Installation of Garage (Domestic Shed) complete job
 Installation of Roller Door (domestic)
 Installation of Steel Portal Roof Trusses by hand
 Installation of Steel Roof Purlins by hand
 Installation of Steel Wall Girths by hand
 Installation of Temporary Height Safety System - Starting from Platform Ladder
 Installation of wall sheeting from Ground
 Mixing concrete with a portable mixer
 Push Wheel Barrow on site
 Screw fixing wall sheeting from platform ladder
 Screw fixing wall sheeting from platform ladder
 Screw fixing wall sheeting from platform ladder
 Stand up clad walls
 Wash out mixer

End of Industry Specific: Home Improvements

Insulated Panels

Install Insulated Panels by hand and using a roller lifting jib (Complete Job)
 Lift insulated panels using a lifting jib and vacuum lifter/Cladboy
 Stand up Insulated Panels using a Forklift and Panel Lifting Jib

End of Industry Specific: Insulated Panels

Joinery

Install prefabricated steel counter frames
 Adjust hinges to joinery doors
 Cut timber to size using a table saw
 Cut wood to size using a table saw
 Grinding/ Polishing bench tops with a handheld grinder
 Install wall mounted cupboards to stud wall
 Install aluminium skirting
 Install cupboards

Install joinery counters and wall units
Install Kick plate
Install pre laminated bench top
Install Stone Benchtops
Install timber wall linings
Install timber wall linings using a battery powered drill
Installation of new kitchen joinery
Lay Hebel panels into frames and grout into position
Position joinery items and level

End of Industry Specific: Joinery

Landscaping

Acceptance of delivery of concrete
Install irrigation poly pipe and fittings
Installation of subsurface irrigation system
Installation of Synthetic Turf
Lay brick pavers
Planting of trees and shrubs by hand
Preparation and installation of synthetic turf
Prepare and lay brick pavers
Screed sand
Sweeping sand over pavers and into cracks
Trowel cement to edges of pavers

End of Industry Specific: Landscaping

Louvres

Install louvre blades into mullion/ blade carriers
Install louvre doors into existing masonry opening
Install louvre mullions to existing steel girths using a battery powered drill
Installation of Horizontal Sunshade Panels into position by hand
Installation of louvre members - Using a boom lift
Loading Louvre members onto roof using a crane
Manually lift panel into position

End of Industry Specific: Louvres

Maritime

Drill hole into the seabed rock with an air over hydraulic drilling rig
Drive piles with a crane lifted vibro hammer vibrating hammer pile driver
Inspection and use of tender and tow vessels
Inspection and use of tender vessel
Inspection and use of the vessel mounted crane
Inspection and use of the vessel mounted forklift
Lowering and raising spuds
Remove the existing jetty fender
Site/ Vessel Orientation/ Induction
Tow and Position Barge
Unload barge from truck to water with a mobile crane
Working in the water
Working on a Barge
Working on a work boat/ vessel

End of Industry Specific: Maritime

Mechanical Services

Connect temporary power supply and test operation of hoist
 Final connections and commissioning of lift
 Install Exhaust hood including ductwork to connect to base building connection
 Install hoist motor
 Installation of four post vehicle hoist
 Installation of four post vehicle hoist (complete job including pick up and del)
 Installation of scissor lift vehicle hoist (complete job inc pick up and del)
 Installation of two post vehicle hoist
 Installation of two post vehicle hoist (complete job including pick up and del)
 Lift Car Installation and Fit Out
 Lift Installation
 Lift Shaft Fitout
 Lift shaft rail installation into Masonry shaft
 Plumb Lift Shaft
 Removal and Replacement of gantry crane radio control unit
 Routine Inspection of 2 post vehicle hoist
 Routine Inspection of 4 post vehicle hoist
 Routine Inspection of scissor lift vehicle hoist

End of Industry Specific: Mechanical Services

Metalwork

Installation of stainless steel benches and cabinets (Complete Job)
 Meat Rail Installation (Complete Job)

End of Industry Specific: Metalwork

Painting and Decorating

Fill holes and imperfections
 Painting of ceilings
 Painting of walls
 Painting of Walls and Ceilings
 Painting with an electric airless sprayer

End of Industry Specific: Painting and Decorating

Plumbing

Back Fill trench by hand with original spoil
 Clean trenches and setting grade by hand
 Clearing a blocked drain using an Electric Eel – Drain Snake
 Commercial drainage and hot & cold water reticulation (complete plumbing job 1)
 Connect pipes together using a flexible connector
 Connect sewer drain to government connection
 Connect water inlet and outlet
 Cut down UPVC risers using a battery powered angle grinder
 Cut down UPVC risers using an angle grinder
 Cut into existing earthenware branch using and angle grinder
 Dig Trench by hand
 Drain water system
 Drill hole into existing concrete slab with an electric rotary hammer drill
 Drill hole into existing concrete slab with an electric rotary hammer drill
 Drill hole into existing concrete slab with an electric rotary hammer drill
 Electro-Fusion Welding of MDPE of HDPE pipe
 Fit "T"s and connectors to plastic pipes
 Fit cover plates and mini cocks to outlets

Fit Pipe insulation over pipes
 Fit Tapware/ mixers
 Glue jointing closed cell elastomeric pipe insulation
 Install backflow prevention valve
 Install BlackMAX® SewerMAX® SewerMAX+® pipes
 Install cistern and flush pipe
 Install damp proof membrane to trimmers/noggings prior to brass fittings
 Install dishwasher
 Install electric storage hot water service (HWS)
 Install gas instantaneous hot water service (HWS)
 Install hand basins
 Install hot and cold water fist fix plumbing (Steel framed)
 Install hot and cold water fist fix plumbing (Timber framed)
 Install hot and cold water fist fix plumbing (Wood framed)
 Install sinks/ troughs
 Install Stopcock valve
 Install suspended pipework to underside of concrete slab
 Install suspended pipework to underside of roof purlins
 Install temporary caps to fixtures
 Install toilet (WC Pan)
 Install trimmers/ nogging to steel framing
 Install trimmers/ noggings to timber framing
 Install W45 Brass male lugged elbows, breaching pieces and mixers to steel frame
 Install Zip Autoboil
 Installation of baths
 Installation of Dual Wall Polypropylene storm drainage pipe
 Installation of Gas storage hot water system (HWS)
 Installation of mechanical masonry anchors
 Installation of underfloor plumbing and drains
 Installation of UPVC pipe
 Isolate water to premises
 Lift member using a forklift and lifting jib
 Load skid steer excavator onto truck/ trailer using aluminium ramps
 Mark out studwork for trimmer and fixture locations
 Pipe freezing using liquid nitrogen
 Plug the unit into the power supply outlet
 Plumbing final fit
 Pressure testing of hot and cold pipework
 Pumping and Gas installation to new tenancy
 Run copper plumbing pipework and fit off
 Run plastic water/ gas pipework and fit off
 Secure W45 Brass male lugged elbows, breaching pieces and mixers
 Service and replacement of TMV in masonry wall
 Sleeve and apply silicone around pipework passing through holes
 Test the property's gas pipework for pressure leaks
 Unpack fixtures/ materials
 Welding copper tube
 Welding/ silver soldering copper pipes together
 Working in open trench

End of Industry Specific: Plumbing

Precast

Joint Caulking

Propping/Bracing of existing walls

End of Industry Specific: Precast

Rigging

Access work area using a personnel crane cage/ dog box/ workbox

Industrial rope access

Install, beams, rafters, bracing and other members using a crane

Installation of Columns - Using a Crane

Installation of steel cable

End of Industry Specific: Rigging

Roof Tiling

Re-bed tiled roof ridge capping

Carrying mortar in a bucket to work area

Mix mortar in a wheel barrow

Place tile onto mortar bed and trowel off

Replace broken roof tiles

Repointing of ridge tiles

Set up mortar bed formwork frame

End of Industry Specific: Roof Tiling

Roofing

Apply silicone to joint

Cleanout gutter by hand

Creating Roof Penetrations

Cut Insulated Panel with a circular saw

Cut metal roof sheets with battery powered shears

Cut metal roof sheets with electric shears

Cut metal wall sheets with battery powered shears

Cutting Roof Sheets with snips

Fit angles and trims using a battery powered drill and pop rivets

Form and Flash Roof Penetrations

Install Box Gutter with saddles straps and gutter board

Install Pierced Fixed Roof Sheets using a battery powered drill

Install Safety Anchors to an existing roof (Timber from above and below)

Install Stone Sheeting

Install Temporary Edge Protection

Install Temporary Edge Protection from an EWP

Install top hats to steel structure

Install variable pitch roof ventilators to metal roof

Installation of Air-Cell Insulation

Installation of Anchorpoints to existing roof

Installation of concealed clip roof decking

Installation of Downpipes

Installation of Eaves Gutters

Installation of fascia cladding - From a scaffold

Installation of fascia cladding - From a scissor lift

Installation of Flashings using a battery powered drill

Installation of insulation to roof

Installation of insulation to walls
 Installation of metal battens
 Installation of metal Fascia
 Installation of Metal Fascias from ladder
 Installation of Rain Water Head
 Installation of Roof Sheets – To Sprung Curved Roof
 Installation of roof vents
 Installation of Roof walkway
 Installation of Safety Mesh from Roof
 Installation of Safety Mesh to roof area - From EWP
 Installation of Safety Mesh to roof area - From Scaffold
 Installation of Safety Mesh to Roof From Roof and Scissor Lift on one side
 Installation of Soffit Sheeting - From EWP
 Installation of Soffit Sheeting - From Scaffold
 Installation of Static line system
 Installation of Support Mesh to walls - Using Scissor Lift
 Installation of Temporary Anchorpoints to existing roof
 Installation of Temporary Height Safety System - starting from Scissor
 Installation of Temporary Height Safety System - to Existing roof from Scaffold
 Installation of Temporary Height Safety System to new roof
 Installation of Temporary Static Line
 Installation of top hats to masonry wall
 Installation of UPVC Pipe
 Installation of vent ridge
 Installation of wall sheeting from Ground and Boom Lift
 Installation of wall sheeting from Ground and Scaffold
 Installation of wall sheeting from Ground and Scissor Lift
 Installing External/ Internal Downpipes
 Installing Rain Water Heads
 Installing Roof Sheets – To Flat Roof Area
 Load materials into boom lift
 Loading Roof Sheets or materials with Crane
 Measure Roofing using temporary Anchor Points
 Moving materials over the roof
 New-Roofing (Domestic)
 Passing up Roof Sheets and Accessories from the ground
 Re-fall box gutter
 Removal of Asbestos products
 Removal of Ceiling Sheets
 Removal of Existing (Flat Roof)- Roof Sheeting
 Removal of existing Blanket insulation
 Removal of existing Box Gutter
 Removal of existing ceiling flashings
 Removal of existing Ceiling Insulation from open roof
 Removal of existing roof flashings
 Removal of existing Roof Sheeting and Accessories
 Removal of existing Roof Sheeting and Accessories
 Removal of existing Roof Sheeting and Accesories
 Removal of existing roof tiles

Removal of Existing RWH
Removal of materials from roof area by hand - Using EWP
Removal of wall sheeting
Remove all materials, equipment and waste from site
Remove and reinstate dektites
Remove and Reinstate Roof Screws
Remove and reinstate Skylight sheeting
Re-Roofing
Roof Plumbing Servicing and Maintenance
Visual Inspection of Structure

End of Industry Specific: Roofing

Scaffolder

Erecting, Altering and Dismantling Prefabricated Steel Modular Scaffolding
Erection and use of a steel tube scaffold
Erection and use of aluminium tube scaffold
Erection and Use of Mobile Scaffold (Extended Version)
Installation of cantilevered K-Stage Modular Steel Scaffold
Installation of K-Stage Modular Steel Scaffold

End of Industry Specific: Scaffolder

Seating

Attach platform to wall bracket
Install Drive Motor to Platform Frame
Install end safety rails to Retractable platforms
Installation of Chair Modules
Installation of fixed stadium seating (complete Job)
Installation of fixing brackets to concrete
Installation of Plywood Decks
Installation of retractable stadium seating

End of Industry Specific: Seating

Shelving and Racking

Assemble Frames and bolt together
Dismantling of Pallet Racking
Install handrails to platform
Install horizontal racking beams from a scissor lift
Install horizontal racking beams from ground
Install staircase assembly using a forklift and lifting jib
Installation of cantilever racking
Installation of Longspan shelving
Installation of Pallet Racking
Installation of Pallet Racking (complete job)
Installation of Static Shelving
Installation of Stock Picking Racking
Level racking and bolt to slab
Manually lower installed rack frames to the ground
Pigeon Hole Rack Assembly (Complete Job)
Remove horizontal racking beams from a scissor lift
Remove horizontal racking beams from ground
Stand up pre-assembled rack frames
Stand up pre-assembled rack frames using a Forklift and Rack Frame Lifting Jib

End of Industry Specific: Shelving and Racking

Solid Plastering

- Chip out loose concrete/ cement or render with scabbling hammer
- Clean masonry surface using an electric grinder and cup disc
- Inspection and use of electric mortar / grout / plaster mixer
- Mix acrylic render in a bucket using an electric drill
- Mixing Adhesive/ Mortar/ Render/ Cement based products with an electric drill
- Rendering/ solid plastering
- Trowel acrylic render onto surface

End of Industry Specific: Solid Plastering

Steel Fixer

- Cut steel reinforcing using bolt cutters
- Place steel reinforcing in footing

End of Industry Specific: Steel Fixer

Steel House Framing

- Install steel ceiling battens, stabilisers, etc
- Install steel roof trusses by hand
- Installation of metal roof battens and trimmers
- Installation of steel house framing

End of Industry Specific: Steel House Framing

Structural Steel

- Claim work area on rail line
- Cleaning steel using a battery powered grinder with a wire brush attachment
- Cleaning steel using an electric grinder with a wire brush attachment
- Concrete filling of Columns by bucket
- Coring concrete
- Crane Set Up
- Cutting Steel with an Oxy- Torch
- Drill hole using a magnetic drill
- Grout Columns
- Inject Epoxy into holes
- Install connecting bolts and tension nuts using a battery powered rattle gun
- Installation of Ball Tube Handrail
- Installation of Chem Anchors onto existing masonry surface
- Installation of Chem Anchors onto existing masonry wall
- Installation of Columns by hand
- Installation of Dynabolts
- Installation of Floor Grating
- Installation of Girts - Using an EWP
- Installation of Hold Down bolts into existing Concrete
- Installation of Roof Purlins - Using a Crane
- Installation of Steel Members - Using an EWP
- Installation of Steel Bracing Members - Using an EWP
- Installation of Steel Members - Using a Crane
- Installation of Steel members by hand
- Installation of Wall plate by Hand
- Installing Bolts through existing concrete slab
- Land Column into position with Crane
- Land Member into position using crane

Lift members into position by hand
Lifting materials using duct lifters
Lifting members using a chain block
Removal of Steel Members by hand using EWP
Repairs to a Fuel Vessel
Tension nuts using a battery powered rattle gun
Welding cleats to existing structure with a portable electric welder

End of Industry Specific: Structural Steel

Wall and Ceiling Linings

Clean up buckets and tools
Cut Drywall using a drywall hand saw
Cut fibre cement sheet using an electric circular fibre cement saw
Cut hole into existing Drywall surface using a key hole Drywall saw
Cut plasterboard using a key hole plasterboard saw
Cut plasterboard using a plasterboard hand saw
Drywall finishing
Flushing to screws and joints in linings
Install fibre cement linings
Install fibre cement linings using a battery powered drill
Install suspended ceiling grid
Installation of drywall linings
Installation of insulation Batts to wall and ceiling framing
Installation of plasterboard linings
Installing Cement Sheet Cladding
Manufacture Steel Stud Wall Frames
Manufacture/ build Steel Stud Wall Frames on site
Sanding of finished drywall by hand
Sanding of flushed joints by hand
Sanding of flushed joints using an electric drywall / plasterboard sander
Suspended ceiling, steel stud, flush jointed plasterboard (complete job)

End of Industry Specific: Wall and Ceiling Linings

Wall and Floor Tiling

Cut tiles using an angle grinder
Grout tiles
Laying floor tiles
Laying wall tiles
Mix adhesive in a bucket using an electric drill
Mix grout in a bucket using an electric drill
Mixing cement with a portable electric mixer
Placing a cement screed
Remove existing grout between tiles
Wall and floor tiling to domestic residence
Wash out bucket

End of Industry Specific: Wall and Floor Tiling

Waterproofing

Heat rubberized asphalt in an oil- or air-jacketed melter
Hot Fluid-Applied Rubberized Asphalt Waterproofing
Install waterproofing polymer cementitious membrane
Spray primer onto surface using a hand sprayer

End of Industry Specific: Waterproofing

Windows and Doors

Cork joint with Polyurethane sealant

Install aluminium door frame into existing masonry opening

Install preassembled window frame into existing opening and screw fix

Installation of Aluminium Doors and Door Hardware

Installation of Wooden Doors and Door Hardware using battery powered tools

End of Industry Specific: Windows and Doors

End of Industry Type: Construction

Healthcare & Medical

Aged Care

Dealing with people with dementia or aggression

End of Industry Specific: Aged Care

Homecare

Assist client in and out of a chair

End of Industry Specific: Homecare

Physiotherapy

In home Physiotherapy

End of Industry Specific: Physiotherapy

End of Industry Type: Healthcare & Medical

Hire and Rental

Hire and Rental

Delivery, cleaning and removal of portable toilets

End of Industry Specific: Hire and Rental

End of Industry Type: Hire and Rental

Horticulture

Agriculture

Inspection and use of self-propelled Sprayer

Inspection and use of Tractor Implement Sprayers

End of Industry Specific: Agriculture

Arboriculture

Clearing and Grubbing Highway (complete job)

Climb Tree

Climb Tree to lop branches

Cut tree using a gasoline powered chainsaw

Cut tree using a petrol powered chainsaw

Cut tree using gasoline powered pole saw

Cut tree using petrol powered pole saw

Felling of tree from the ground - not requiring a climber

Felling of tree using Climbing Technique

Felling of tree using Climbing Technique and using wood chipper

Inspection and use of gasoline powered chainsaw

Inspection and use of petrol powered chainsaw

Load stump grinding machine onto trailer using aluminium ramps

Mulching of trees and branches using a Brush/ Wood Chipper

Mulching of trees and branches using a Brush/ Wood Chipper (extended version)

Put on Harness and set up ropes

Safety check and operation of Excavator for clearing and grubbing

Safety Inspection and use of Hydraulic Harvester Head attachment

Stump Grinding

Unload stump grinding machine from trailer using aluminium ramps

End of Industry Specific: Arboriculture

Landscape Horticulture

Clear the area and move existing pot plants

Pruning with Hand Pruners/ Shears (Secateurs)

Safety Inspection and use of Horizontal Grinder

End of Industry Specific: Landscape Horticulture

Parks and Gardens

Carrying green waste by hand

Control of pedestrians through work area

Discovery of syringes or needles/ sharps

Herbicide Spraying by hand

Inspection and use of gasoline powered Brush cutter/ Grass Trimmer

Inspection and use of gasoline powered walk behind lawn mower

Inspection and use of petrol powered Brushcutter/ Grass Trimmer

Inspection and use of petrol powered walk behind lawn mower

Inspection and use of skid steer mounted slasher

Inspection and use of Stand on Sprayer

Inspection and use of tractor mounted slasher

Inspection and use of Tractor Sprayers

Inspection and use of Tractor with flail mower

Inspection and use of Tractor with scarifier

Inspection and use of Tractor with Verti-Drain

Load Tractor/ ride on lawnmower onto trailer using aluminium ramps

Loading and dragging bags of waste to bin or vehicle

Mulching of garden waste using a gasoline powered mulcher

Mulching of garden waste using a petrol-powered mulcher

Prune branches using hand operated extendable pole pruner or pole saw

Spreading fertilizer and manure

Spreading mulch by bucketing and spreading with shovel and rake

Spreading soil with Shovel and Rake

Unload tractor/ ride on lawnmower from trailer using aluminium ramps

Use of Tractor and Broadcaster

Working beneath large fig trees

Working on sloping/ steep ground

Working outside in the sun

Working with spikey plants

End of Industry Specific: Parks and Gardens

End of Industry Type: Horticulture

Hospitality

Kitchen

Clean kitchen appliances or tools

Food Handling

Food Safety

Install Kitchen Appliances

Storage and use of Hazardous Chemicals/ Substances

Use of electric appliances or tools
Use of kitchen gas cookers and appliances
Using a commercial dishwasher
Using knives and sharp tools
Working in a commercial kitchen

End of Industry Specific: Kitchen

Security

Install cameras and sensors
Replace existing cameras and sensors

End of Industry Specific: Security

End of Industry Type: Hospitality

Pest Control

Ant, Insect and spider control

Pesticide spraying by hand

End of Industry Specific: Ant, Insect and spider control

Feral animal control

Aerial Shooting and Baiting from helicopters
Automated corral trapping
Foot hold trapping
Ground Baiting using 1080 poison
Preparing a tranquillizer syringe and dart
Preparing a tranquillizer syringe, dart and use of tranquilising firearms
Safety inspection and use of firearms for hunting

End of Industry Specific: Feral animal control

End of Industry Type: Pest Control

Primary Industries

Livestock Grazing

Aerial Mustering
Inspect and Drive Off Road Vehicle/ 4WD
Inspection and use of Tractor
Mustering using Off Road and 4WD vehicles

End of Industry Specific: Livestock Grazing

End of Industry Type: Primary Industries

Security

Security Patrols

Check and Lock down pool area
Check Carpark
Check exterior of premises
Check Gymnasium
Internal Patrols of Student Accommodation
Patrol of Student Accommodation Facility

End of Industry Specific: Security Patrols

End of Industry Type: Security

Traffic Management

Traffic control

Establish a Safe Work Zone-Working on or adjacent road (Traffic Control)
Traffic control in night conditions
Traffic control station set up and operation of traffic control (Stop/ slow bat)

End of Industry Specific: Traffic control
End of Industry Type: Traffic Management
Transport
Furniture Removalist
Lift and carry looses furniture
End of Industry Specific: Furniture Removalist
Truck
Deliver materials to site and unload manually
Delivery and unloading of mobile plant
Driving long distances
Inspect and drive truck
Load restraint
Loading materials onto truck by hand
Unload truck using a crane
End of Industry Specific: Truck
End of Industry Type: Transport
Waste and resource recovery
Construction and Demolition
Changeover of skip bin
Delivery of skip bin
Pick up filled skip bin
End of Industry Specific: Construction and Demolition
Liquid waste
Pump out domestic septic tank using a vacuum truck
Pump out grease trap tank using a vacuum truck
Pump out waste milk using a vacuum truck
Removal of liquid waste milk
End of Industry Specific: Liquid waste
Sweepers
Inspection and use of industrial automatic ride on sweeper/scrubber
Inspection and use of Truck Mounted Street Sweeper
End of Industry Specific: Sweepers
End of Industry Type: Waste and resource recovery
