

(your logo will replace this one)

Industry Type	Industry Specific	Work Description
Administration		
Office		
Photocopying		
End of Industry Specific: Office		
End of Industry Type: Administration		
All Industry Types		
All Trades		
Accept load to vehicle from forklift (3rd Party operator) and Loading by hand		
Acceptance of delivery to site for materials		
Charging of Li-Ion batteries for use with cordless tools		
Connect hose to existing water supply tap		
Cutting material with a box cutter/ utility knife/ snap blade knife/ sharp tool		
Driving in and out of carparks and on customer premises		
Driving in and out of carparks and on customer premises		
Inspect and drive passenger/ light commercial vehicle		
Listening to music while working		
Monitoring and review of JHA		
Monitoring and Review of SWMS		
Safety inspection and use of Forklift		
Site orientation of domestic residence		
Site Orientation/ Induction		
Sweeping Floor or ground		
Unloading of shipping container with forklift and by hand		
Vacuum		
Working in an area with the risk of Coronavirus, Covid-19, Influenza or similar		
Working in Cold Conditions		
Working in High Wind Conditions		
Working in hot conditions		
Working in the rain		
Write up incident report		
End of Industry Specific: All Trades		
End of Industry Type: All Industry Types		
Automotive and Plant		
Mechanical		
Inspection and use of Four Post Vehicle Hoist		
Inspection and use of Two Post Vehicle Hoist		
on site Servicing to diesel powered vehicle		
Replace diesel fuel filters		
Replace fuel filters		
Safety inspection and use of TTL Hydraulic Torque Wrench and hydraulic pump		
Safety inspection and use of TTS Hydraulic Torque Wrench and hydraulic pump		
Safety inspection and use of TTX Hydraulic Torque Wrench and hydraulic pump		

Servicing to vehicle in workshop

End of Industry Specific: Mechanical

Servicing

Change Spark Plugs

Check batteries and charging system

Check system for gas leaks

Grease moving parts and greaseable joints

Inspect/ Repair skirts and scrubber or sweeping brushes

Inspection and use of a gasoline powered air compressor

Inspection and use of petrol powered air compressor

Jack up vehicle/machine

On site Servicing to gasoline powered vehicle

on site Servicing to petrol powered vehicle

Open engine cover/ bonnet/ service compartment

Remove and replace wheels using a pneumatic rattle gun

Replace air filter

Replace brake pads using a pneumatic rattle gun

Replace engine oil and filters

Replace hydraulic hose

Replace hydraulic oil and filters

Replace radiator coolant

servicing a ride on electric sweeper (Complete Job)

servicing a walk gas operated behind sweeper/scrubber (Complete Job)

Servicing to hybrid industrial automatic ride on sweeper/scrubber

Servicing to hybrid industrial automatic ride on sweeper/scrubber (Complete job)

Tune engine

End of Industry Specific: Servicing

End of Industry Type: Automotive and Plant

Cleaning

All Cleaning industries

Carpet Cleaning

Inspection and use of electric high pressure water sprayer

Inspection and use of gasoline powered blower/ vacuum

Inspection and use of gasoline powered high pressure water sprayer

Inspection and use of petrol powered blower/ vacuum

End of Industry Specific: All Cleaning industries

Commercial Cleaning

Clean bathroom

Clean Glass shower screen with a cloth

Clean Glass with a cloth

Clean mirror with a cloth

Clean Window Using Pure Water Technology

Clean Windows Using rope Access

Clean Windows with mop and squeegee

Cleaning of hard surfaces

Cleaning of office and showroom

Cleaning of residence

Cleaning of Rest Rooms / Toilets

Gain access to work are using Rope Access
Inspection and use of Carpet Extractor
Inspection and use of High-Speed Propane (LPG) Powered Floor Buffer (Burnisher)
Inspection and use of Low-Speed Electric Floor Buffer
Inspection and use of planetary floor polisher
Inspection and use of walk behind battery powered floor scrubber
Remove bag from bins and waste paper baskets
Steam cleaning of tiles

End of Industry Specific: Commercial Cleaning

Domestic Cleaning

Mopping Floor

End of Industry Specific: Domestic Cleaning

End of Industry Type: Cleaning

Construction

Air Conditioning and Refrigeration

Access ceiling space via Ladder
Core hole through masonry wall with a battery powered rotary hammer drill
Cut aluminium angles using a hacksaw and mitre box
Cut copper pipe with tube cutter
Cut hole into existing plasterboard ceiling using a key hole plasterboard saw
Cut Steel/ Unistrut with drop saw
Disconnect pipework form existing plant
Filling & testing of pipework
Fit Pipe insulation over pipes
Fit Unistrut brackets onto masonry wall
Fix aluminium channels to existing slab using battery powered hammer drill
Hang condensing unit onto masonry wall
Hang Fan cooler unit inside cool room
Install ceiling registers
Install flexi ductwork and zone motors in ceiling space
Install insulated ceiling panels to cool room
Install new wall mounted unit
Install TX Valve
Installation of Cool Room
Installation of ducted system air conditioner
Installation of new refrigeration System to new supermarket (complete job)
Installation of new refrigeration to coolroom (complete job)
Installation of refrigeration system to cool room
Installation of support angles or channels to hanging rods
Installation of threaded rod hanging bars
Installation of underfloor refrigeration pipework
Installation of wall hung split system air conditioner
Mixing Polyurethane Isocyanate in a bucket using an electric drill
Mount condensing unit onto preinstalled Unistrut brackets
Place copper pipes into trench ducting
Pour Polyurethane Isocyanate into pipe duct
Pressure testing of pipework with nitrogen and charge with refrigerant (HCFC)
Reclaim refrigerant gas from existing system

Refrigerant charge the system using a vacuum pump

Remove existing wall mounted unit

Replacement of ducted system air conditioner

Replacement of wall hung split system air conditioner

Run connecting copper pipework and fit off

Run Pipe work through existing ceiling space

Secure pipework to structure with saddles

Silver solder copper pipes together

Stand up cool room panels and fit into bottom track

End of Industry Specific: Air Conditioning and Refrigeration

All Trades

Acceptance of delivery to site for materials via Crane Truck

Access roof via Boom Lift

Access roof via fixed access ladder

Access roof via Ladder

Access Roof via scaffold stair access

Access roof via Scissor Lift

Access work area using a platform ladder

Access work area using a step ladder

Access work area via a mobile scaffold

Access work area via a scaffold/ working at heights from a scaffold

Apply touch up paint

Carrying materials from storage area to work area

Claim Work Area

Cleaning up work area

Cut materials using an electric mitre saw

Cut steel using a battery powered angle grinder

Cut Steel using an Angle Grinder

Cut strapping off around pack of materials

Drill hole into masonry surface with a battery powered rotary hammer drill

Drill hole into masonry surface with an electric rotary hammer drill

Drill hole using a Battery Powered Drill

Drill hole using an electric drill

Erection and use of mobile scaffold

High Risk Construction Work covered in this SWMS

Inform facilities / operations and security personnel of work location(s)

Inspect and drive passenger/ light commercial vehicle on or off site

Inspection and use of Generator

Inspection and use of petrol powered high pressure water sprayer

Install screws using a Battery Powered Drill

Install screws using a tek gun

Load materials/members into scissor lift

Loading Materials onto roof using an EWP

Loading materials onto truck using a crane and by hand

Marking Out Slab or Ground

Move materials using a trolley (sack Truck)

Moving materials around on a trolley

Push Wheel Barrow on site

Refuelling of machinery

Remove all materials, equipment and waste from site
Repeat the above process steps until completion of task
Safety Check And Use Of Boom Lift (extended version)
Safety Check And Use Of Scissor Lift (Extended version)
Site Emergency Response Procedure
Undertake Clients general all sites induction
Using an Angle Grinder
Using an Existing roof anchorpoint system
Welding with a portable Electric Welder
Working at height from a boom lift
Working at height from a scissor lift
Working at heights - Generally
Working at heights - Genrally
Working in isolation
Working where there is movement of powered mobile plant

End of Industry Specific: All Trades

Bricklaying

Acid wash surface by hand
Bricklaying
Bricklaying to new project home
Carry blocks by hand
Carry bricks using a mechanical brick carrier (Clamps)
Cut bricks using a gasoline powered brick saw
Cut bricks using a petrol powered brick saw
Cut bricks using an angle grinder
Installation of Glass Blocks to existing opening
Installation of lintel by hand
Installation of viscourse
Load bricks onto scaffold by hand
Mixing cement/ mortar with a portable gasoline powered mixer
Mixing cement/ mortar with a portable petrol powered mixer
Set up mortar boards
Set up Profolds to corners
Wash down brick wall

End of Industry Specific: Bricklaying

Carpentry

1st fix carpentry to new 2 story dwelling using a Pneumatic and Impulse Nail Gun
1st fix carpentry to new dwelling using a Pneumatic and Impulse Nail Gun
Apply construction adhesive using a calking gun
Create temporary work bench using trestles and planks
Cut fibre cement sheeting using electric shears
Cut fibre cement sheeting using hand operated mechanical shears
Cut Hebel/ Autoclaved Aerated Concrete with a diamond blade circular saw
Cut timber beading using a hand saw and mitre box
Cut timber using a battery powered circular saw
Cut timber using a battery powered reciprocating saw
Cut timber using a circular saw
Cut timber using a jigsaw
Cut timber using a reciprocating saw

Cut timber using an electric mitre saw

Cut wood beading using a hand saw and mitre box

Cut wood using a battery powered circular saw

Cut wood using a circular saw

Cut wood using an electric jigsaw

Cut wood using an electric mitre saw

Daily preoperational inspection of a Pneumatic (Air) Nail Gun

Daily preoperational inspection of an Impulse (gas) Nail Gun

Ease/ adjust existing doors

Fix fibre cement cladding sheet in place and nail by hand

Fix fibre cement soffit/ eaves sheet in place and nail by hand

Inspection and use of electric air compressor

Install "STRUCTAflor" particle board flooring

Install ceiling joist, Hanging beams, stabilisers, etc

Install Hebel Panel

Install plywood flooring

Install solid strip timber flooring (Secret Fix) to timber subfloor

Install solid strip wood flooring (Secret Fix) to wood subfloor

Install timber roof trusses by hand

Install trimmers/ noggings to wood framing

Install wood roof trusses by hand

Install wood wall linings using a battery powered drill

Installation of Doors and Door Hardware

Installation of eaves linings to new domestic residence

Installation of floor joist

Installation of Timber Purlins

Manufacture timber wall frames using a mitre saw and an Impulse (gas) Nail Gun

Manufacture timber wall frames using a mitre saw and Pneumatic (Air) Nail Gun

Mark out slab using a chalk line

Measure for cladding above roof

Measure perimeter of house

Nail timber using a pneumatic (Air) nail gun

Nail timber using an Impulse (gas) Nail Gun

Passing up Sheets and Accessories from the ground

Position floor boards together using a plank jack/ floor dog

Removal of existing doors

Set up trestle scaffold

Stand up wall frames

End of Industry Specific: Carpentry

Civil

Arrive at domestic site with truck and establish unloading area

Arrive at domestic site with truck and trailer and establish unloading area

Back Fill trench by hand with original spoil

Back Fill trench using excavator with original spoil

Clean street and footpath

Compact area using a gasoline powered leg rammer

Compact area using a gasoline powered vibrating plate

Compact area using a petrol powered leg rammer

Compact area using a petrol powered vibrating plate

Compact area with Road roller (roller-compactor)

Cutting Bitumen with a Quick Cut Diamond blade saw

Daily preoperational inspection of a Pneumatic Jack Hammer

Delivery and unloading of mobile plant

Delivery, Safety Check And Use Of Dingo

Dig Hole by hand

Dig hole with power driven auger

Dig Trench by hand

Dig trench using a chain trencher

Dumping/Unloading load on ground using a tip truck/ dump truck

Inspect and drive Tip Truck/ Dump Truck

Inspection and use of diesel powered air compressor

Inspection and use of Motor Grader/ Road Grader

Installation of lintel using a skid steer loader

Laying asphalt with paver which is filled from tipper

Laying blue metal paver which is filled from tipper

Load skid steer loader onto trailer using aluminium ramps

Load skid steer loader onto truck using aluminium ramps

Mixing concrete with a portable mixer

Move soil by hand using a shovel

Operation of drilling rig and soil sampling

Place rubble around domestic site using a skid steer loader

Planning for wet weather and flooding events

Raising Sewer/ Stormwater Pits and Valve covers in an existing bitumen roadway

Remove and fit attachments on Excavator

Remove and fit attachments on skid steer loader

Remove rubbish and debris from domestic site using skid steer loader and truck

Remove soil from domestic site using a skid steer loader and truck

Remove spoil from auger using wheel barrow

Safety check and operation of Excavator

Safety check and operation of Excavator for trenching and excavations

Safety inspection and use of skid steer loader

Safety inspection and use of wheeled front end loader

Set up and use laser level

Site Set Out

Spread rubble around site using a skid steer loader

Spreading soil with Shovel and Rake

Tack coating (including use of hand lance) prior to laying asphalt

Unload skid steer excavator from trailer using aluminium ramps

Unload skid steer loader from trailer using aluminium ramps

Unload skid steer loader from truck using aluminium ramps

Using a pneumatic Jack Hammer/ pneumatic Breaker/ Demolition Hammer

End of Industry Specific: Civil

Concreter and Concrete Repair

Abrasive blasting

Apply high strength repair mortar

Apply surface sealant material (Kahfill) to face of crack

Concrete and reinforcement repairs

Concrete crack repair and injection

Concrete Delivery and Pumping
 Dig Hole by hand
 Dig Trench by hand
 Finishing concrete with gasoline powered trowel (Helicopter)
 Finishing concrete with petrol powered trowel (Helicopter)
 Injection of Nitofill LV epoxy resin
 Install damp proof membrane (Forticon plastic)
 Mixing concrete with a portable mixer
 Place steel reinforcing mesh
 Placing Concrete
 Pouring Concrete
 Pouring Concrete Slab using a pump and a helicopter
 Water ingress repair using XYPEX
 Working with silica and silica containing products

End of Industry Specific: Concreter and Concrete Repair

Demolition

Cut masonry wall with a Quick Cut Diamond blade saw
 Cut steel using a reciprocating saw
 Cutting Concrete with a Quick Cut Diamond blade saw
 Decontamination of Plant
 Demolition of brick veneer iron roof house by hand
 Demolition of cupboards and built in robes
 Demolition of existing Drywall lined partition stud wall
 Demolition of existing flush jointed plasterboard ceiling
 Demolition of existing plasterboard lined partition stud wall
 Demolition/ removal of bathroom fixtures and fittings
 Demolition/ Removal of existing carpet and undelay
 Demolition/ removal of existing ceiling tiles
 Demolition/ removal of existing Compactus shelving unit
 Demolition/ Removal of existing insulated panel cool room/ freezer by hand
 Demolition/ removal of existing joinery
 Demolition/ removal of existing suspended exposed grid ceiling
 Demolition/ removal of existing timber framing using a petrol powered chainsaw
 Demolition/ Removal of existing vinyl flooring
 Demolition/ Removal of existing wall and floor tiles using an elec jack hammer
 Demolition/ Removal of timber planking by hand
 Enter asbestos removal area through the Decontamination Unit
 Exit asbestos removal area through the Decontamination Unit
 Jimmy/ prise fixtures away from wall
 Knock out bricks using a hammer
 Lead based paint removal using Peel away Paint Removal System
 Lining of the Truck with Plastic Lining
 Lower materials to ground with ropes
 Part demolition of existing brick wall to form new opening
 Remediation of asbestos contaminated soil by hand and using general hand tools
 Removal of asbestos adhesive from hard surface
 Removal of Asbestos products
 Removal of materials from roof by hand to ground
 Remove asbestos clothing

Remove existing suspended ceiling tiles
 Remove nuts using a battery powered rattle gun
 Remove screws using a battery powered drill
 Removing friable asbestos by hand
 Removing friable asbestos-contaminated soil by hand and using an excavator
 Removing non friable asbestos by hand
 Removing non-friable asbestos-contaminated soil by hand and using an excavator
 Safety check and operation of Excavator for demolition works
 Safety Inspection and use of Hydraulic Rock Breaker
 Safety Inspection and use of Hydraulic Shear attachment
 Selection and Use of PPE
 Spray PVA Glue with an electric airless sprayer
 Using an electric Jack Hammer/ Electric Breaker/ Demolition Hammer

End of Industry Specific: Demolition

Electrical

Connect new cables into electrical plant/ equipment
 Connect new cables into existing switchboard
 Dig Trench by hand
 Disconnect electrical from existing plant
 Electrical installation to new tenancy (Complete Job with scissor lift)
 Fill out and issue Electrical Certificate of Compliance
 Fit power outlet to drywall
 Fit power point to plasterboard wall
 Fit switch to drywall
 Fit switch to plasterboard wall
 Install Inverter
 Install isolator
 Install light fittings
 Install Mounting brackets and rails to roof
 Install solar panels onto the mounting frame
 Installation of cable tray
 Installation of Cable Tray Covers
 Installation of catenary cable
 Installation of Solar System to Domestic Dwelling
 Isolate power to existing system
 Replace existing light fittings
 Rewire in conduits between light fittings
 Run Cables and secure to catenary cable
 Run Cables through existing ceiling space
 Secure conduits to structure with saddles
 Test the electrical installation
 Tracing and identifying existing live lighting circuits - for fault purposes
 Working in ceiling space

End of Industry Specific: Electrical

Fencing

Cut fence sheets with electric shears
 Delivery and installation of temporary fencing
 Install chainmesh fencing
 Install posts

Install star pickets using a hammer and Star Post Dropper

Installation of Panel fencing

Installation of post and rail metal clad fencing

Installation of temporary fencing

Mix concrete in a wheel barrow

Removal of temporary fencing

Screw fence sheets to rail using a battery powered drill

End of Industry Specific: Fencing

Fire Protection

Connect new cables into existing fire panel

Fit speakers and detectors to drywall ceiling

Fit speakers and detectors to plasterboard ceiling

Install suspended fire pipework to underside of concrete slab

Install suspended fire pipework to underside of roof purlins

Run Pipe work and cables through existing ceiling space

Thread pipe using a Portable Power Pipe Threader

Working in a confined space

End of Industry Specific: Fire Protection

Floor Finisher and Coverer

Inspection and use of Diamond Floor Grinder

Install Carpet and underlay to a concrete floor

Install Carpet and underlay to a timber floor

Install vinyl skirting

Install vinyl floors

End of Industry Specific: Floor Finisher and Coverer

Formworker

Install 'Bondek' or Similar formwork to structure Using an Explosive Power Tool

Install bearers and joists to formwork support frames

Install plywood formwork to support framing

Installation of formwork support frames

Installation of simple formwork

Stripping formply

Using an Explosive Power Tool

End of Industry Specific: Formworker

General Building

Accept load from vehicle with forklift (3rd Party operator) + unloading by hand

Another us

Apply epoxy floor coating

Apply Silicone / Liquid Nails / Construction adhesive

Brick and Blocklaying – Complete commercial job scaffold supplied by builder

Carrying materials and equipment (Manual Handling)

Clean up site by hand using a wheel barrow to transfer debris to bin

Concrete filling of blockwork by bucket

Construction Site Establishment and Project Risk Assessment

Cut wood using a battery powered reciprocating saw

Cut wood using a reciprocating saw

Install Acro prop

Install Carpet and underlay to a wood floor

Install Pull down attic ladder into drywall ceiling and wood framing

Installation of UPVC Conduit
Lift member into position using a duct/genie lifter
Project Risk Assessment
Refurbishment of residence/ unit
Remove existing silicone
Welding with a portable TIG welder

End of Industry Specific: General Building

Glazier

Carrying Window frames from storage area to work area
Cut aluminium sections using an electric mitre saw
Install Aluminium deflection head and sub sill
Install glass into frame
Install window frames into deflection head and sub sill
Installation of Glazed aluminium partitions
Unload glass from vehicle onto trolley

End of Industry Specific: Glazier

Height Safety

Inspect and certify the anchor point installation
Inspect and certify the static line installation
Install anchor points into existing concrete slab
Install Horizontal Life line fixed to masonry wall
Install Horizontal Life line fixed to overhead concrete
Install Horizontal Life line fixed to overhead structural steel
Install Horizontal Life line surface mounted to metal roof sheeting
Install modular access ladder to structural wall girts behind wall cladding
Install modular access ladders to existing masonry wall
Install Pull down attic ladder into drywall ceiling and steel framing
Install Pull down attic ladder into plasterboard ceiling and steel framing
Install Pull down attic ladder into plasterboard ceiling and timber framing
Install Pull down attic ladder into suspended exposed grid ceiling
Install rafter mounted anchor points to a tiled roof
Install Rafter Mounted anchor points to tiled roof without edge protection
Install roof access hatch into a metal roof
Install Safety Anchors to an existing roof (Timber from above and below)
Install Safety Anchors to an existing roof (wood from above and below)
Install Surface Mounted anchor points to metal roof
Install Surface Mounted anchor points to metal roof without edge protection
Measure and mark out for system installation
Run and Connect Static Line Cable
Twin rope rescue via pick off and take to ground
Using a Harness and Static Line

End of Industry Specific: Height Safety

Home Improvements

Build Steel Wall Frame and Bolt Wall Girths to Columns
Build Wall Frame and Tek Screw Wall Girths to Columns
Drill Wall Girths and Purlins with an electric drill
Installation of Garage (Domestic Shed) complete job
Installation of Roller Door (domestic)
Installation of Steel Portal Roof Trusses by hand

Installation of Steel Roof Purlins by hand
Installation of Steel Wall Girths by hand
Installation of Temporary Height Safety System - Starting from Platform Ladder
Installation of wall sheeting from Ground
Mixing concrete with a portable mixer
Push Wheel Barrow on site
Screw fixing wall sheeting from platform ladder
Srew fixing wall sheeting from platform ladder
Stand up clad walls
Wash out mixer

End of Industry Specific: Home Improvements

Insulated Panels

Lift insulated panels using a lifting jib and vacuum lifter/Cladboy

End of Industry Specific: Insulated Panels

Joinery

Install prefabricated steel counter frames
Adjust hinges to joinery doors
Cut timber to size using a table saw
Cut wood to size using a table saw
Grinding/ Polishing bench tops with a handheld grinder
Install wall mounted cupboards to stud wall
Install aluminium skirting
Install cupboards
Install joinery counters and wall units
Install Kick plate
Install pre laminated bench top
Install Stone Benchtops
Install timber wall linings using a battery powered drill
Installation of new kitchen joinery
Lay Hebel panels into frames and grout into position
Position joinery items and level

End of Industry Specific: Joinery

Landscaping

Acceptance of delivery of concrete
Install irrigation poly pipe and fittings
Installation of subsurface irrigation system
Installation of Synthetic Turf
Lay brick pavers
Planting of trees and shrubs by hand
Preparation and installation of synthetic turf
Prepare and lay brick pavers
Screed sand
Sweeping sand over pavers and into cracks
Trowel cement to edges of pavers

End of Industry Specific: Landscaping

Louvres

Install louvre blades into mullion/ blade carriers
Install louvre doors into existing masonry opening
Install louvre mullions to existing steel girths using a battery powered drill

Installation of Horizontal Sunshade Panels into position by hand

Installation of louvre members - Using a boom lift

Loading Louvre members onto roof using a crane

Manually lift panel into position

End of Industry Specific: Louvres

Maritime

Drive piles with a crane lifted vibro hammer vibrating hammer pile driver

Inspection and use of tender vessel

Inspection and use of the vessel mounted crane

Inspection and use of the vessel mounted forklift

Lowering and raising spuds

Tow and Position Barge

Unload barge from truck to water with a mobile crane

Working in the water

Working on a Barge

Working on a work boat/ vessel

End of Industry Specific: Maritime

Mechanical Services

Connect temporary power supply and test operation of hoist

Final connections and commissioning of lift

Install hoist motor

Installation of four post vehicle hoist

Installation of four post vehicle hoist (complete job including pick up and del)

Installation of scissor lift vehicle hoist (complete job inc pick up and del)

Installation of two post vehicle hoist

Installation of two post vehicle hoist (complete job including pick up and del)

Lift Car Installation and Fit Out

Lift Installation

Lift Shaft Fitout

Lift shaft rail installation into Masonry shaft

Plumb Lift Shaft

Removal and Replacement of gantry crane radio control unit

Routine Inspection of 2 post vehicle hoist

Routine Inspection of 4 post vehicle hoist

Routine Inspection of scissor lift vehicle hoist

End of Industry Specific: Mechanical Services

Metalwork

Installation of stainless steel benches and cabinets (Complete Job)

Meat Rail Installation (Complete Job)

End of Industry Specific: Metalwork

Painting and Decorating

Fill holes and imperfections

Painting of ceilings

Painting of walls

Painting of Walls and Ceilings

Painting with an electric airless sprayer

End of Industry Specific: Painting and Decorating

Plumbing

Back Fill trench by hand with original spoil

Clean trenches and setting grade by hand

Clearing a blocked drain using an Electric Eel – Drain Snake

Commercial drainage and hot & cold water reticulation (complete plumbing job 1)

Connect pipes together using a flexible connector

Connect sewer drain to government connection

Connect water inlet and outlet

Cut down UPVC risers using a battery powered angle grinder

Cut down UPVC risers using an angle grinder

Cut into existing earthenware branch using and angle grinder

Dig Trench by hand

Drain water system

Drill hole into existing concrete slab with an electric rotary hammer drill

Drill hole into existing concrete slab with an electric rotary hammer drill

Electro-Fusion Welding of MDPE or HDPE pipe

Fit “T”s and connectors to plastic pipes

Fit cover plates and mini cocks to outlets

Fit Pipe insulation over pipes

Fit Tapware/ mixers

Glue jointing closed cell elastomeric pipe insulation

Install backflow prevention valve

Install cistern and flush pipe

Install damp proof membrane to trimmers/noggings prior to brass fittings

Install dishwasher

Install electric storage hot water service (HWS)

Install gas instantaneous hot water service (HWS)

Install hand basins

Install hot and cold water fist fix plumbing (Steel framed)

Install hot and cold water fist fix plumbing (Timber framed)

Install hot and cold water fist fix plumbing (Wood framed)

Install sinks/ troughs

Install Stopcock valve

Install suspended pipework to underside of concrete slab

Install suspended pipework to underside of roof purlins

Install temporary caps to fixtures

Install toilet (WC Pan)

Install trimmers/ nogging to steel framing

Install trimmers/ noggings to timber framing

Install W45 Brass male lugged elbows, breaching pieces and mixers to steel frame

Install Zip Autoboil

Installation of baths

Installation of Gas storage hot water system (HWS)

Installation of mechanical masonry anchors

Installation of underfloor plumbing and drains

Installation of UPVC pipe

Isolate water to premises

Lift member using a forklift and lifting jib

Load skid steer excavator onto truck/ trailer using aluminium ramps

Mark out studwork for trimmer and fixture locations

Pipe freezing using liquid nitrogen

Plug the unit into the power supply outlet
 Plumbing final fit
 Pressure testing of hot and cold pipework
 Run copper plumbing pipework and fit off
 Run plastic water/ gas pipework and fit off
 Secure W45 Brass male lugged elbows, breaching pieces and mixers
 Service and replacement of TMV in masonry wall
 Sleeve and apply silicone around pipework passing through holes
 Test the property's gas pipework for pressure leaks
 Unpack fixtures/ materials
 Welding copper tube
 Welding/ silver soldering copper pipes together
 Working in open trench

End of Industry Specific: Plumbing

Precast

Joint Caulking

End of Industry Specific: Precast

Rigging

Industrial rope access
 Installation of Columns - Using a Crane
 Installation of steel cable

End of Industry Specific: Rigging

Roof Tiling

Re-bed tiled roof ridge capping
 Carrying mortar in a bucket to work area
 Mix mortar in a wheel barrow
 Place tile onto mortar bed and trowel off
 Replace broken roof tiles
 Repointing of ridge tiles
 Set up mortar bed formwork frame

End of Industry Specific: Roof Tiling

Roofing

Apply silicone to joint
 Cleanout gutter by hand
 Creating Roof Penetrations
 Cut Insulated Panel with a circular saw
 Cut metal roof sheets with battery powered shears
 Cut metal roof sheets with electric shears
 Cut metal wall sheets with battery powered shears
 Cutting Roof Sheets with snips
 Fit angles and trims using a battery powered drill and pop rivets
 Form and Flash Roof Penetrations
 Install Box Gutter with saddles straps and gutter board
 Install Pierced Fixed Roof Sheets using a battery powered drill
 Install Stone Sheeting
 Install Temporary Edge Protection
 Install Temporary Edge Protection from an EWP
 Install top hats to steel structure
 Install variable pitch roof ventilators to metal roof

Installation of Air-Cell Insulation
 Installation of Anchorpoints to existing roof
 Installation of concealed clip roof decking
 Installation of Downpipes
 Installation of Eaves Gutters
 Installation of fascia cladding - From a scaffold
 Installation of fascia cladding - From a scissor lift
 Installation of Flashings using a battery powered drill
 Installation of insulation to roof
 Installation of insulation to walls
 Installation of metal battens
 Installation of metal Fascia
 Installation of Metal Fascias from ladder
 Installation of Rain Water Head
 Installation of Roof Sheets – To Sprung Curved Roof
 Installation of roof vents
 Installation of Roof walkway
 Installation of Safety Mesh from Roof
 Installation of Safety Mesh to roof area - From EWP
 Installation of Safety Mesh to roof area - From Scaffold
 Installation of Safety Mesh to Roof From Roof and Scissor Lift on one side
 Installation of Soffit Sheeting - From EWP
 Installation of Soffit Sheeting - From Scaffold
 Installation of Static line system
 Installation of Support Mesh to walls - Using Scissor Lift
 Installation of Temporary Height Safety System - starting from Scissor
 Installation of Temporary Height Safety System - to Existing roof from Scaffold
 Installation of Temporary Height Safety System to new roof
 Installation of Temporary Static Line
 Installation of top hats to masonry wall
 Installation of UPVC Pipe
 Installation of vent ridge
 Installation of wall sheeting from Ground and Boom Lift
 Installation of wall sheeting from Ground and Scaffold
 Installation of wall sheeting from Ground and Scissor Lift
 Installing External/ Internal Downpipes
 Installing Rain Water Heads
 Installing Roof Sheets – To Flat Roof Area
 Load materials into boom lift
 Loading Roof Sheets or materials with Crane
 Measure Roofing using temporary Anchor Points
 Moving materials over the roof
 New-Roofing (Domestic)
 Passing up Roof Sheets and Accessories from the ground
 Re-fall box gutter
 Removal of Asbestos products
 Removal of Ceiling Sheets
 Removal of Existing (Flat Roof)- Roof Sheeting
 Removal of existing Blanket insulation

- Removal of existing Box Gutter
- Removal of existing ceiling flashings
- Removal of existing Ceiling Insulation from open roof
- Removal of existing roof flashings
- Removal of existing Roof Sheeting and Accessories
- Removal of existing Roof Sheeting and Accesories
- Removal of existing roof tiles
- Removal of Existing RWH
- Removal of materials from roof area by hand - Using EWP
- Removal of wall sheeting
- Remove and reinstate dektites
- Remove and Reinstall Roof Screws
- Remove and reinstate Skylight sheeting
- Re-Roofing
- Roof Plumbing Servicing and Maintenance
- Visual Inspection of Structure

End of Industry Specific: Roofing

Scaffolder

- Erecting, Altering and Dismantling Prefabricated Steel Modular Scaffolding
- Erection and use of a steel tube scaffold
- Erection and use of aluminium tube scaffold
- Erection and Use of Mobile Scaffold (Extended Version)
- Installation of cantilevered K-Stage Modular Steel Scaffold
- Installation of K-Stage Modular Steel Scaffold

End of Industry Specific: Scaffolder

Seating

- Attach platform to wall bracket
- Install Drive Motor to Platform Frame
- Install end safety rails to Retractable platforms
- Installation of Chair Modules
- Installation of fixed stadium seating (complete Job)
- Installation of fixing brackets to concrete
- Installation of Plywood Decks
- Installation of retractable stadium seating

End of Industry Specific: Seating

Shelving and Racking

- Assemble Frames and bolt together
- Dismantling of Pallet Racking
- Install handrails to platform
- Install horizontal racking beams from a scissor lift
- Install horizontal racking beams from ground
- Install staircase assembly using a forklift and lifting jib
- Installation of cantilever racking
- Installation of Longspan shelving
- Installation of Pallet Racking
- Installation of Pallet Racking (complete job)
- Installation of Static Shelving
- Installation of Stock Picking Racking
- Level racking and bolt to slab

Manually lower installed rack frames to the ground

Pigeon Hole Rack Assembly (Complete Job)

Remove horizontal racking beams from a scissor lift

Remove horizontal racking beams from ground

Stand up pre-assembled rack frames

Stand up pre-assembled rack frames using a Forklift and Rack Frame Lifting Jib

End of Industry Specific: Shelving and Racking

Solid Plastering

Chip out loose concrete/ cement or render with scabbling hammer

Clean masonry surface using an electric grinder and cup disc

Inspection and use of electric mortar / grout / plaster mixer

Mix acrylic render in a bucket using an electric drill

Mixing Adhesive/ Mortar/ Render/ Cement based products with an electric drill

Rendering/ solid plastering

Trowel acrylic render onto surface

End of Industry Specific: Solid Plastering

Steel Fixer

Cut steel reinforcing using bolt cutters

Place steel reinforcing in footing

End of Industry Specific: Steel Fixer

Structural Steel

Claim work area on rail line

Cleaning steel using a battery powered grinder with a wire brush attachment

Cleaning steel using an electric grinder with a wire brush attachment

Concrete filling of Columns by bucket

Coring concrete

Crane Set Up

Cutting Steel with an Oxy- Torch

Drill hole using a magnetic drill

Grout Columns

Inject Epoxy into holes

Install connecting bolts and tension nuts using a battery powered rattle gun

Installation of Ball Tube Handrail

Installation of Chem Anchors onto existing masonry surface

Installation of Chem Anchors onto existing masonry wall

Installation of Columns by hand

Installation of Dynabolts

Installation of Floor Grating

Installation of Girts - Using an EWP

Installation of Hold Down bolts into existing Concrete

Installation of Roof Purlins - Using a Crane

Installation of Steel Members - Using an EWP

Installation of Steel Bracing Members - Using an EWP

Installation of Steel Members - Using a Crane

Installation of Steel members by hand

Installation of Wall plate by Hand

Installing Bolts through existing concrete slab

Land Column into position with Crane

Land Member into position using crane

Lift members into position by hand
Lifting materials using duct lifters
Lifting members using a chain block
Removal of Steel Members by hand using EWP
Tension nuts using a battery powered rattle gun
Welding cleats to existing structure with a portable electric welder

End of Industry Specific: Structural Steel

Wall and Ceiling Linings

Access work area using 'Hop-Up' trestle ladder/ work platform
Clean up buckets and tools
Cut Drywall using a drywall hand saw
Cut fibre cement sheet using an electric circular fibre cement saw
Cut hole into existing Drywall surface using a key hole Drywall saw
Cut plasterboard using a key hole plasterboard saw
Cut plasterboard using a plasterboard hand saw
Drywall finishing
Flushing to screws and joints in linings
Install fibre cement linings using a battery powered drill
Install suspended ceiling grid
Installation of drywall linings
Installation of insulation Batts to wall and ceiling framing
Installation of plasterboard linings
Installing Cement Sheet Cladding
Manufacture/ build Steel Stud Wall Frames on site
Sanding of finished drywall by hand
Sanding of flushed joints by hand
Sanding of flushed joints using an electric drywall / plasterboard sander
Suspended ceiling, steel stud, flush jointed plasterboard (complete job)

End of Industry Specific: Wall and Ceiling Linings

Wall and Floor Tiling

Cut tiles using an angle grinder
Grout tiles
Laying floor tiles
Laying wall tiles
Mix adhesive in a bucket using an electric drill
Mix grout in a bucket using an electric drill
Mixing cement with a portable electric mixer
Placing a cement screed
Remove existing grout between tiles
Wall and floor tiling to domestic residence
Wash out bucket

End of Industry Specific: Wall and Floor Tiling

Waterproofing

Install waterproofing polymer cementitious membrane

End of Industry Specific: Waterproofing

Windows and Doors

Cork joint with Polyurethane sealant
Install aluminium door frame into existing masonry opening
Install preassembled window frame into existing opening and screw fix

Installation of Aluminium Doors and Door Hardware

Installation of Wooden Doors and Door Hardware using battery powered tools

End of Industry Specific: Windows and Doors

End of Industry Type: Construction

Healthcare & Medical

Aged Care

Dealing with people with dementia or aggression

End of Industry Specific: Aged Care

Homecare

Assist client in and out of a chair

End of Industry Specific: Homecare

Physiotherapy

In home Physiotherapy

End of Industry Specific: Physiotherapy

End of Industry Type: Healthcare & Medical

Hire and Rental

Hire and Rental

Delivery, cleaning and removal of portable toilets

End of Industry Specific: Hire and Rental

End of Industry Type: Hire and Rental

Horticulture

Arboriculture

Clearing and Grubbing Highway (complete job)

Climb Tree

Climb Tree to lop branches

Cut tree using a gasoline powered chainsaw

Cut tree using a petrol powered chainsaw

Cut tree using gasoline powered pole saw

Cut tree using petrol powered pole saw

Felling of tree from the ground - not requiring a climber

Felling of tree using Climbing Technique and using wood chipper

Inspection and use of gasoline powered chainsaw

Inspection and use of petrol powered chainsaw

Load stump grinding machine onto trailer using aluminium ramps

Mulching of trees and branches using a Brush/ Wood Chipper

Mulching of trees and branches using a Brush/ Wood Chipper (extended version)

Put on Harness and set up ropes

Safety check and operation of Excavator for clearing and grubbing

Safety Inspection and use of Hydraulic Harvester Head attachment

Stump Grinding

Unload stump grinding machine from trailer using aluminium ramps

End of Industry Specific: Arboriculture

Landscape Horticulture

Clear the area and move existing pot plants

Pruning with Hand Pruners/ Shears (Secateurs)

Safety Inspection and use of Horizontal Grinder

End of Industry Specific: Landscape Horticulture

Parks and Gardens

Carrying green waste by hand
 Control of pedestrians through work area
 Discovery of syringes or needles/ sharps
 Herbicide Spraying by hand
 Inspection and use of gasoline powered Brush cutter/ Grass Trimmer
 Inspection and use of gasoline powered walk behind lawn mower
 Inspection and use of petrol powered Brushcutter/ Grass Trimmer
 Inspection and use of petrol powered walk behind lawn mower
 Inspection and use of skid steer mounted slasher
 Inspection and use of tractor mounted slasher
 Load Tractor/ ride on lawnmower onto trailer using aluminium ramps
 Loading and dragging bags of waste to bin or vehicle
 Mulching of garden waste using a gasoline powered mulcher
 Mulching of garden waste using a petrol-powered mulcher
 Prune branches using hand operated extendable pole pruner or pole saw
 Spreading fertilizer and manure
 Spreading mulch by bucketing and spreading with shovel and rake
 Spreading soil with Shovel and Rake
 Unload tractor/ ride on lawnmower from trailer using aluminium ramps
 Working beneath large fig trees
 Working on sloping/ steep ground
 Working outside in the sun
 Working with spikey plants

End of Industry Specific: Parks and Gardens

End of Industry Type: Horticulture

Pest Control

Ant, Insect and spider control

Pesticide spraying by hand

End of Industry Specific: Ant, Insect and spider control

Feral animal control

Aerial Shooting and Baiting from helicopters

Automated corral trapping

Foot hold trapping

Ground Baiting using 1080 poison

Safety inspection and use of firearms for hunting

End of Industry Specific: Feral animal control

End of Industry Type: Pest Control

Primary Industries

Livestock Grazing

Aerial Mustering

Inspect and Drive Off Road Vehicle/ 4WD

Inspection and use of Tractor

Mustering using Off Road and 4WD vehicles

End of Industry Specific: Livestock Grazing

End of Industry Type: Primary Industries

Security

Security Patrols

Check and Lock down pool area

Check Carpark
Check exterior of premises
Check Gymnasium
Internal Patrols of Student Accommodation
Patrol of Student Accommodation Facility

End of Industry Specific: Security Patrols

End of Industry Type: Security

Traffic Management

Traffic control

Establish a Safe Work Zone-Working on or adjacent road (Traffic Control)
Traffic control in night conditions
Traffic control station set up and operation of traffic control (Stop/ slow bat)

End of Industry Specific: Traffic control

End of Industry Type: Traffic Management

Transport

Truck

Deliver materials to site and unload manually
Delivery and unloading of mobile plant
Driving long distances
Inspect and drive truck
Loading materials onto truck by hand

End of Industry Specific: Truck

End of Industry Type: Transport

Waste and resource recovery

Construction and Demolition

Changeover of skip bin
Delivery of skip bin
Pick up filled skip bin

End of Industry Specific: Construction and Demolition

Liquid waste

Pump out domestic septic tank using a vacuum truck
Pump out grease trap tank using a vacuum truck
Pump out waste milk using a vacuum truck
Removal of liquid waste milk

End of Industry Specific: Liquid waste

Sweepers

Inspection and use of industrial automatic ride on sweeper/scrubber
Inspection and use of Truck Mounted Street Sweeper

End of Industry Specific: Sweepers

End of Industry Type: Waste and resource recovery
