Industry Type	Industry Specific	Work Description
Administration		
Office		
Photocopying		
End of Industry Specific: Office		
End of Industry Type: Administration		
All Industry Types		
All Trades		
Accept load to vehicle from forklift (3rd Party operator) and Loading by hand		
Acceptance of delivery to site for materials		
Charging of Li-Ion batteries for use with cordless tools		
Connect hose to existing water supply tap		
Cutting material with a box cutter/ utility knife/ snap blade knife/ sharp tool		
Driving in and out of carparks and on customer premises		
Driving in and out of carparks and on customer premises		
Inspect and drive passenger/ light commercial vehicle		
Listening to music while working		
Monitoring and review of JHA		
Monitoring and Review of SWMS		
Safety inspection and use of Forklift		
Site orientation of domestic residence		
Site Orientation/ Induction		
Sweeping Floor or ground		
Unloading of shipping container with forklift and by hand		
Vacuum		
Working in an area with the risk of Coronavirus, Covid-19, Influenza or similar		
Working in Cold Conditions		
Working in High Wind Conditions		
Working in hot conditions		
Working in the rain		
Write up incident report		
End of Industry Specific: All Trades		
End of Industry Type: All Industry Types		
Automotive and Plant		
Mechanical		
Inspection and use of Four Post Vehicle Hoist		
Inspection and use of Two Post Vehicle Hoist		
on site Servicing to diesel powered vehicle		
Replace diesel fuel filters		
Replace fuel filters		
Safety inspection and use of TTL Hydraulic Torque Wrench and hydraulic pump		
Safety inspection and use of TTS Hydraulic Torque Wrench and hydraulic pump		
Safety inspection and use of TTX Hydraulic Torque Wrench and hydraulic pump		

Servicing to vehicle in workshop

End of Industry Specific: Mechanical

Servicing

Change Spark Plugs

Check batteries and charging system

Check system for gas leaks

Grease moving parts and greaseable joints

Inspect/ Repair skirts and scrubber or sweeping brushes

Inspection and use of a gasoline powered air compressor

Inspection and use of petrol powered air compressor

Jack up vehicle/machine

On site Servicing to gasoline powered vehicle

on site Servicing to petrol powered vehicle

Open engine cover/ bonnet/ service compartment

Remove and replace wheels using a pneumatic rattle gun

Replace air filter

Replace brake pads using a pneumatic rattle gun

Replace engine oil and filters

Replace hydraulic hose

Replace hydraulic oil and filters

Replace radiator coolant

servicing a ride on electric sweeper (Complete Job)

servicing a walk gas operated behind sweeper/scrubber (Complete Job)

Servicing to hybrid industrial automatic ride on sweeper/scrubber

Servicing to hybrid industrial automatic ride on sweeper/scrubber (Complete job)

Tune engine

End of Industry Specific: Servicing

End of Industry Type: Automotive and Plant

Cleaning

All Cleaning industries

Carpet Cleaning

Inspection and use of electric high pressure water sprayer

Inspection and use of gasoline powered blower/ vacuum

Inspection and use of gasoline powered high pressure water sprayer

Inspection and use of petrol powered blower/ vacuum

End of Industry Specific: All Cleaning industries

Commercial Cleaning

Clean bathroom

Clean Glass shower screen with a cloth

Clean Glass with a cloth

Clean mirror with a cloth

Clean Window Using Pure Water Technology

Clean Windows Using rope Access

Clean Windows with mop and squeegee

Cleaning of hard surfaces

Cleaning of office and showroom

Cleaning of residence

Cleaning of Rest Rooms / Toilets

Gain access to work are using Rope Access  
 Inspection and use of Carpet Extractor  
 Inspection and use of High-Speed Propane (LPG) Powered Floor Buffer (Burnisher)  
 Inspection and use of Low-Speed Electric Floor Buffer  
 Inspection and use of planetary floor polisher  
 Inspection and use of walk behind battery powered floor scrubber  
 Remove bag from bins and waste paper baskets  
 Steam cleaning of tiles

End of Industry Specific: Commercial Cleaning

Domestic Cleaning

Mopping Floor

End of Industry Specific: Domestic Cleaning

End of Industry Type: Cleaning

Construction

Air Conditioning and Refrigeration

Access ceiling space via Ladder  
 Core hole through masonry wall with a battery powered rotary hammer drill  
 Cut aluminium angles using a hacksaw and mitre box  
 Cut copper pipe with tube cutter  
 Cut hole into existing plasterboard ceiling using a key hole plasterboard saw  
 Cut Steel/ Unistrut with drop saw  
 Disconnect pipework form existing plant  
 Filling & testing of pipework  
 Fit Pipe insulation over pipes  
 Fit Unistrut brackets onto masonry wall  
 Fix aluminium channels to existing slab using battery powered hammer drill  
 Hang condensing unit onto masonry wall  
 Hang Fan cooler unit inside cool room  
 Install ceiling registers  
 Install flexi ductwork and zone motors in ceiling space  
 Install insulated ceiling panels to cool room  
 Install new wall mounted unit  
 Install TX Valve  
 Installation of Cool Room  
 Installation of ducted system air conditioner  
 Installation of new refrigeration System to new supermarket (complete job)  
 Installation of refrigeration system to cool room  
 Installation of support angles or channels to hanging rods  
 Installation of threaded rod hanging bars  
 Installation of underfloor refrigeration pipework  
 Installation of wall hung split system air conditioner  
 Mixing Polyurethane Isocyanate in a bucket using an electric drill  
 Mount condensing unit onto preinstalled Unistrut brackets  
 Place copper pipes into trench ducting  
 Pour Polyurethane Isocyanate into pipe duct  
 Pressure testing of pipework with nitrogen and charge with refrigerant (HCFC)  
 Reclaim refrigerant gas from existing system  
 Refrigerant charge the system using a vacuum pump

Remove existing wall mounted unit  
Replacement of ducted system air conditioner  
Replacement of wall hung split system air conditioner  
Run connecting copper pipework and fit off  
Run Pipe work through existing ceiling space  
Secure pipework to structure with saddles  
Silver solder copper pipes together  
Stand up cool room panels and fit into bottom track

#### End of Industry Specific: Air Conditioning and Refrigeration

#### All Trades

Acceptance of delivery to site for materials via Crane Truck  
Access roof via Boom Lift  
Access roof via fixed access ladder  
Access roof via Ladder  
Access Roof via scaffold stair access  
Access roof via Scissor Lift  
Access work area using a platform ladder  
Access work area using a step ladder  
Access work area using 'Hop-Up' trestle ladder/ work platform  
Access work area via a mobile scaffold  
Access work area via a scaffold/ working at heights from a scaffold  
Apply touch up paint  
Carrying materials from storage area to work area  
Claim Work Area  
Cleaning up work area  
Cut materials using an electric mitre saw  
Cut steel using a battery powered angle grinder  
Cut Steel using an Angle Grinder  
Cut strapping off around pack of materials  
Drill hole into masonry surface with a battery powered rotary hammer drill  
Drill hole into masonry surface with an electric rotary hammer drill  
Drill hole using a Battery Powered Drill  
Drill hole using an electric drill  
Erection and use of mobile scaffold  
High Risk Construction Work covered in this SWMS  
Inform facilities / operations and security personnel of work location(s)  
Inspect and drive passenger/ light commercial vehicle on or off site  
Inspection and use of Generator  
Inspection and use of petrol powered high pressure water sprayer  
Install screws using a Battery Powered Drill  
Install screws using a tek gun  
Loading Materials onto roof using an EWP  
Loading materials onto truck using a crane and by hand  
Marking Out Slab or Ground  
Move materials using a trolley (sack Truck)  
Moving materials around on a trolley  
Push Wheel Barrow on site  
Refuelling of machinery  
Remove all materials, equipment and waste from site

Repeat the above process steps until completion of task  
Safety Check And Use Of Boom Lift (extended version)  
Safety Check And Use Of Scissor Lift (Extended version)  
Undertake Clients general all sites induction  
Using an Angle Grinder  
Using an Existing roof anchorpoint system  
Welding with a portable Electric Welder  
Working at height from a boom lift  
Working at height from a scissor lift  
Working at heights - Genrally  
Working in isolation  
Working where there is movement of powered mobile plant

#### End of Industry Specific: All Trades

##### Bricklaying

Acid wash surface by hand  
Bricklaying  
Bricklaying to new project home  
Carry blocks by hand  
Carry bricks using a mechanical brick carrier (Clamps)  
Cut bricks using a gasoline powered brick saw  
Cut bricks using a petrol powered brick saw  
Cut bricks using an angle grinder  
Installation of lintel by hand  
Installation of viscourse  
Load bricks onto scaffold by hand  
Mixing cement/ mortar with a portable gasoline powered mixer  
Mixing cement/ mortar with a portable petrol powered mixer  
Set up mortar boards  
Set up Profolds to corners  
Wash down brick wall

#### End of Industry Specific: Bricklaying

##### Carpentry

1st fix carpentry to new 2 story dwelling using a Pneumatic and Impulse Nail Gun  
1st fix carpentry to new dwelling using a Pneumatic and Impulse Nail Gun  
Apply construction adhesive using a calking gun  
Create temporary work bench using trestles and planks  
Cut fibre cement sheeting using electric shears  
Cut fibre cement sheeting using hand operated mechanical shears  
Cut Hebel/ Autoclaved Aerated Concrete with a diamond blade circular saw  
Cut timber beading using a hand saw and mitre box  
Cut timber using a battery powered circular saw  
Cut timber using a battery powered reciprocating saw  
Cut timber using a circular saw  
Cut timber using a jigsaw  
Cut timber using a reciprocating saw  
Cut timber using an electric mitre saw  
Cut wood beading using a hand saw and mitre box  
Cut wood using a battery powered circular saw  
Cut wood using a circular saw

Cut wood using an electric jigsaw

Cut wood using an electric mitre saw

Daily preoperational inspection of a Pneumatic (Air) Nail Gun

Daily preoperational inspection of an Impulse (gas) Nail Gun

Ease/ adjust existing doors

Fix fibre cement cladding sheet in place and nail by hand

Fix fibre cement soffit/ eaves sheet in place and nail by hand

Inspection and use of electric air compressor

Install "STRUCTAflor" particle board flooring

Install ceiling joist, Hanging beams, stabilisers, etc

Install Hebel Panel

Install plywood flooring

Install solid strip timber flooring (Secret Fix) to timber subfloor

Install solid strip wood flooring (Secret Fix) to wood subfloor

Install timber roof trusses by hand

Install trimmers/ noggings to wood framing

Install wood roof trusses by hand

Install wood wall linings using a battery powered drill

Installation of Doors and Door Hardware

Installation of eaves linings to new domestic residence

Installation of floor joist

Installation of Timber Purlins

Manufacture timber wall frames using a mitre saw and an Impulse (gas) Nail Gun

Manufacture timber wall frames using a mitre saw and Pneumatic (Air) Nail Gun

Mark out slab using a chalk line

Measure for cladding above roof

Measure perimeter of house

Nail timber using a pneumatic (Air) nail gun

Nail timber using an Impulse (gas) Nail Gun

Passing up Sheets and Accessories from the ground

Position floor boards together using a plank jack/ floor dog

Removal of existing doors

Set up trestle scaffold

Stand up wall frames

#### End of Industry Specific: Carpentry

#### Civil

Arrive at domestic site with truck and establish unloading area

Arrive at domestic site with truck and trailer and establish unloading area

Back Fill trench by hand with original spoil

Back Fill trench using excavator with original spoil

Clean street and footpath

Compact area using a gasoline powered leg rammer

Compact area using a gasoline powered vibrating plate

Compact area using a petrol powered leg rammer

Compact area using a petrol powered vibrating plate

Compact area with Road roller (roller-compactor)

Cutting Bitumen with a Quick Cut Diamond blade saw

Daily preoperational inspection of a Pneumatic Jack Hammer

Delivery and unloading of mobile plant

Delivery, Safety Check And Use Of Dingo

Dig Hole by hand

Dig hole with power driven auger

Dig Trench by hand

Dig trench using a chain trencher

Dumping/Unloading load on ground using a tip truck/ dump truck

Inspect and drive Tip Truck/ Dump Truck

Inspection and use of diesel powered air compressor

Inspection and use of Motor Grader/ Road Grader

Installation of lintel using a skid steer loader

Laying asphalt with paver which is filled from tipper

Laying blue metal paver which is filled from tipper

Load skid steer loader onto trailer using aluminium ramps

Load skid steer loader onto truck using aluminium ramps

Mixing concrete with a portable mixer

Move soil by hand using a shovel

Operation of drilling rig and soil sampling

Place rubble around domestic site using a skid steer loader

Planning for wet weather and flooding events

Raising Sewer/ Stormwater Pits and Valve covers in an existing bitumen roadway

Remove and fit attachments on Excavator

Remove and fit attachments on skid steer loader

Remove rubbish and debris from domestic site using skid steer loader and truck

Remove soil from domestic site using a skid steer loader and truck

Remove spoil from auger using wheel barrow

Safety check and operation of Excavator

Safety check and operation of Excavator for trenching and excavations

Safety inspection and use of skid steer loader

Safety inspection and use of wheeled front end loader

Set up and use laser level

Site Set Out

Spread rubble around site using a skid steer loader

Spreading soil with Shovel and Rake

Tack coating (including use of hand lance) prior to laying asphalt

Unload skid steer excavator from trailer using aluminium ramps

Unload skid steer loader from trailer using aluminium ramps

Unload skid steer loader from truck using aluminium ramps

Using a pneumatic Jack Hammer/ pneumatic Breaker/ Demolition Hammer

#### End of Industry Specific: Civil

#### Concreter and Concrete Repair

Abrasive blasting

Apply high strength repair mortar

Apply surface sealant material (Kahfill) to face of crack

Concrete and reinforcement repairs

Concrete crack repair and injection

Concrete Delivery and Pumping

Dig Hole by hand

Dig Trench by hand

Finishing concrete with gasoline powered trowel (Helicopter)

Finishing concrete with petrol powered trowel (Helicopter)

Injection of Nitofill LV epoxy resin

Install damp proof membrane (Forticon plastic)

Mixing concrete with a portable mixer

Place steel reinforcing mesh

Placing Concrete

Pouring Concrete

Pouring Concrete Slab using a pump and a helicopter

Water ingress repair using XYPEX

Working with silica and silica containing products

## End of Industry Specific: Concreter and Concrete Repair

### Demolition

Cut masonry wall with a Quick Cut Diamond blade saw

Cut steel using a reciprocating saw

Cutting Concrete with a Quick Cut Diamond blade saw

Decontamination of Plant

Demolition of cupboards and built in robes

Demolition of existing Drywall lined partition stud wall

Demolition of existing flush jointed plasterboard ceiling

Demolition of existing plasterboard lined partition stud wall

Demolition/ removal of bathroom fixtures and fittings

Demolition/ Removal of existing carpet and undelay

Demolition/ removal of existing ceiling tiles

Demolition/ removal of existing Compactus shelving unit

Demolition/ Removal of existing insulated panel cool room/ freezer by hand

Demolition/ removal of existing joinery

Demolition/ removal of existing suspended exposed grid ceiling

Demolition/ Removal of existing vinyl flooring

Demolition/ Removal of existing wall and floor tiles using an elec jack hammer

Demolition/ Removal of timber planking by hand

Enter asbestos removal area through the Decontamination Unit

Exit asbestos removal area through the Decontamination Unit

Jimmy/ prise fixtures away from wall

Knock out bricks using a hammer

Lead based paint removal using Peel away Paint Removal System

Lining of the Truck with Plastic Lining

Lower materials to ground with ropes

Part demolition of existing brick wall to form new opening

Remediation of asbestos contaminated soil by hand and using general hand tools

Removal of asbestos adhesive from hard surface

Removal of Asbestos products

Remove asbestos clothing

Remove existing suspended ceiling tiles

Remove nuts using a battery powered rattle gun

Remove screws using a battery powered drill

Removing friable asbestos by hand

Removing friable asbestos-contaminated soil by hand and using an excavator

Removing non friable asbestos by hand

Removing non-friable asbestos-contaminated soil by hand and using an excavator

Safety check and operation of Excavator for demolition works  
Safety Inspection and use of Hydraulic Rock Breaker  
Safety Inspection and use of Hydraulic Shear attachment  
Selection and Use of PPE  
Spray PVA Glue with an electric airless sprayer  
Using an electric Jack Hammer/ Electric Breaker/ Demolition Hammer

#### End of Industry Specific: Demolition

#### Electrical

Connect new cables into electrical plant/ equipment  
Connect new cables into existing switchboard  
Dig Trench by hand  
Disconnect electrical from existing plant  
Fill out and issue Electrical Certificate of Compliance  
Fit power outlet to drywall  
Fit power point to plasterboard wall  
Fit switch to drywall  
Fit switch to plasterboard wall  
Install Inverter  
Install isolator  
Install Mounting brackets and rails to roof  
Install solar panels onto the mounting frame  
Installation of cable tray  
Installation of Cable Tray Covers  
Installation of catenary cable  
Installation of Solar System to Domestic Dwelling  
Isolate power to existing system  
Replace existing light fittings  
Rewire in conduits between light fittings  
Run Cables and secure to catenary cable  
Run Cables through existing ceiling space  
Secure conduits to structure with saddles  
Test the electrical installation  
Tracing and identifying existing live lighting circuits - for fault purposes  
Working in ceiling space

#### End of Industry Specific: Electrical

#### Fencing

Cut fence sheets with electric shears  
Delivery and installation of temporary fencing  
Install chainmesh fencing  
Install posts  
Install star pickets using a hammer and Star Post Dropper  
Installation of Panel fencing  
Installation of post and rail metal clad fencing  
Installation of temporary fencing  
Mix concrete in a wheel barrow  
Removal of temporary fencing  
Screw fence sheets to rail using a battery powered drill

#### End of Industry Specific: Fencing

#### Fire Protection

Connect new cables into existing fire panel  
Fit speakers and detectors to drywall ceiling  
Fit speakers and detectors to plasterboard ceiling  
Install suspended fire pipework to underside of concrete slab  
Install suspended fire pipework to underside of roof purlins  
Run Pipe work and cables through existing ceiling space  
Thread pipe using a Portable Power Pipe Threader  
Working in a confined space

#### End of Industry Specific: Fire Protection

#### Floor Finisher and Coverer

Inspection and use of Diamond Floor Grinder  
Install Carpet and underlay to a concrete floor  
Install Carpet and underlay to a timber floor  
Install vinyl skirting  
Install vinyl floors

#### End of Industry Specific: Floor Finisher and Coverer

#### Formworker

Install 'Bondek' or Similar formwork to structure Using an Explosive Power Tool  
Install bearers and joists to formwork support frames  
Install plywood formwork to support framing  
Installation of formwork support frames  
Installation of simple formwork  
Stripping formply  
Using an Explosive Power Tool

#### End of Industry Specific: Formworker

#### General Building

Another us  
Bins for tear 1  
Brick and Blocklaying – Complete commercial job scaffold supplied by builder  
Clean up site by hand using a wheel barrow to transfer debris to bin  
Concrete filling of blockwork by bucket  
Construction Site Establishment and Project Risk Assessment  
Cut wood using a battery powered reciprocating saw  
Cut wood using a reciprocating saw  
Install Acro prop  
Install Carpet and underlay to a wood floor  
Install Pull down attic ladder into drywall ceiling and wood framing  
Project Risk Assessment  
Refurbishment of residence/ unit  
Remove existing silicone

#### End of Industry Specific: General Building

#### Glazier

Carrying Window frames from storage area to work area  
Cut aluminium sections using an electric mitre saw  
Install Aluminium deflection head and sub sill  
Install glass into frame  
Install window frames into deflection head and sub sill  
Installation of Glazed aluminium partitions  
Unload glass from vehicle onto trolley

## End of Industry Specific: Glazier

### Height Safety

- Inspect and certify the anchor point installation
- Inspect and certify the static line installation
- Install anchor points into existing concrete slab
- Install Horizontal Life line fixed to masonry wall
- Install Horizontal Life line fixed to overhead concrete
- Install Horizontal Life line fixed to overhead structural steel
- Install Horizontal Life line surface mounted to metal roof sheeting
- Install modular access ladder to structural wall girts behind wall cladding
- Install modular access ladders to existing masonry wall
- Install Pull down attic ladder into drywall ceiling and steel framing
- Install Pull down attic ladder into plasterboard ceiling and steel framing
- Install Pull down attic ladder into plasterboard ceiling and timber framing
- Install Pull down attic ladder into suspended exposed grid ceiling
- Install rafter mounted anchor points to a tiled roof
- Install Rafter Mounted anchor points to tiled roof without edge protection
- Install roof access hatch into a metal roof
- Install Safety Anchors to an existing roof (Timber from above and below)
- Install Safety Anchors to an existing roof (wood from above and below)
- Install Surface Mounted anchor points to metal roof
- Install Surface Mounted anchor points to metal roof without edge protection
- Measure and mark out for system installation
- Run and Connect Static Line Cable
- Twin rope rescue via pick off and take to ground
- Using a Harness and Static Line

## End of Industry Specific: Height Safety

### Home Improvements

- Build Steel Wall Frame and Bolt Wall Girths to Columns
- Build Wall Frame and Tek Screw Wall Girths to Columns
- Drill Wall Girths and Purlins with an electric drill
- Installation of Garage (Domestic Shed) complete job
- Installation of Roller Door (domestic)
- Installation of Steel Portal Roof Trusses by hand
- Installation of Steel Roof Purlins by hand
- Installation of Steel Wall Girths by hand
- Installation of Temporary Height Safety System - Starting from Platform Ladder
- Installation of wall sheeting from Ground
- Mixing concrete with a portable mixer
- Push Wheel Barrow on site
- Srew fixing wall sheeting from platform ladder
- Stand up clad walls
- Wash out mixer

## End of Industry Specific: Home Improvements

### Joinery

- Install prefabricated steel counter frames
- Adjust hinges to joinery doors
- Cut timber to size using a table saw
- Cut wood to size using a table saw

Grinding/ Polishing bench tops with a handheld grinder

Install wall mounted cupboards to stud wall

Install aluminium skirting

Install cupboards

Install Kick plate

Install pre laminated bench top

Install timber wall linings using a battery powered drill

Installation of new kitchen joinery

Lay Hebel panels into frames and grout into position

#### End of Industry Specific: Joinery

#### Landscaping

Acceptance of delivery of concrete

Install irrigation poly pipe and fittings

Installation of subsurface irrigation system

Installation of Synthetic Turf

Lay brick pavers

Planting of trees and shrubs by hand

Preparation and installation of synthetic turf

Prepare and lay brick pavers

Screed sand

Sweeping sand over pavers and into cracks

Trowel cement to edges of pavers

#### End of Industry Specific: Landscaping

#### Louvres

Install louvre blades into mullion/ blade carriers

Install louvre doors into existing masonry opening

Install louvre mullions to existing steel girths using a battery powered drill

Installation of Horizontal Sunshade Panels into position by hand

Installation of louvre members - Using a boom lift

Loading Louvre members onto roof using a crane

Manually lift panel into position

#### End of Industry Specific: Louvres

#### Maritime

Drive piles with a crane lifted vibro hammer vibrating hammer pile driver

Inspection and use of tender vessel

Inspection and use of the vessel mounted crane

Inspection and use of the vessel mounted forklift

Lowering and raising spuds

Tow and Position Barge

Unload barge from truck to water with a mobile crane

Working in the water

Working on a Barge

Working on a work boat/ vessel

#### End of Industry Specific: Maritime

#### Mechanical Services

Connect temporary power supply and test operation of hoist

Final connections and commissioning of lift

Install hoist motor

Installation of four post vehicle hoist

Installation of four post vehicle hoist (complete job including pick up and del)  
 Installation of scissor lift vehicle hoist (complete job inc pick up and del)  
 Installation of two post vehicle hoist  
 Installation of two post vehicle hoist (complete job including pick up and del)  
 Lift Car Installation and Fit Out  
 Lift Installation  
 Lift Shaft Fitout  
 Lift shaft rail installation into Masonry shaft  
 Plumb Lift Shaft  
 Removal and Replacement of gantry crane radio control unit  
 Routine Inspection of 2 post vehicle hoist  
 Routine Inspection of 4 post vehicle hoist  
 Routine Inspection of scissor lift vehicle hoist

End of Industry Specific: Mechanical Services

Painting and Decorating

Fill holes and imperfections  
 Painting of ceilings  
 Painting of walls  
 Painting of Walls and Ceilings  
 Painting with an electric airless sprayer

End of Industry Specific: Painting and Decorating

Plumbing

Back Fill trench by hand with original spoil  
 Clean trenches and setting grade by hand  
 Clearing a blocked drain using an Electric Eel – Drain Snake  
 Commercial drainage and hot & cold water reticulation (complete plumbing job 1 )  
 Connect pipes together using a flexible connector  
 Connect sewer drain to government connection  
 Connect water inlet and outlet  
 Cut down UPVC risers using a battery powered angle grinder  
 Cut down UPVC risers using an angle grinder  
 Cut into existing earthenware branch using and angle grinder  
 Dig Trench by hand  
 Drain water system  
 Drill hole into existing concrete slab with an electric rotary hammer drill  
 Electro-Fusion Welding of MDPE or HDPE pipe  
 Fit "T"s and connectors to plastic pipes  
 Fit cover plates and mini cocks to outlets  
 Fit Pipe insulation over pipes  
 Fit Tapware/ mixers  
 Glue jointing closed cell elastomeric pipe insulation  
 Install backflow prevention valve  
 Install cistern and flush pipe  
 Install damp proof membrane to trimmers/noggings prior to brass fittings  
 Install dishwasher  
 Install electric storage hot water service (HWS)  
 Install gas instantaneous hot water service (HWS)  
 Install hand basins  
 Install hot and cold water fist fix plumbing (Steel framed)

Install hot and cold water fist fix plumbing (Timber framed)  
 Install hot and cold water fist fix plumbing (Wood framed)  
 Install sinks/ troughs  
 Install Stopcock valve  
 Install suspended pipework to underside of concrete slab  
 Install suspended pipework to underside of roof purlins  
 Install temporary caps to fixtures  
 Install toilet (WC Pan)  
 Install trimmers/ nogging to steel framing  
 Install trimmers/ noggings to timber framing  
 Install W45 Brass male lugged elbows, breaching pieces and mixers to steel frame  
 Install Zip Autoboil  
 Installation of baths  
 Installation of Gas storage hot water system (HWS)  
 Installation of mechanical masonry anchors  
 Installation of underfloor plumbing and drains  
 Installation of UPVC pipe  
 Isolate water to premises  
 Lift member using a forklift and lifting jib  
 Load skid steer excavator onto truck/ trailer using aluminium ramps  
 Mark out studwork for trimmer and fixture locations  
 Pipe freezing using liquid nitrogen  
 Plug the unit into the power supply outlet  
 Plumbing final fit  
 Pressure testing of hot and cold pipework  
 Run copper plumbing pipework and fit off  
 Run plastic water/ gas pipework and fit off  
 Secure W45 Brass male lugged elbows, breaching pieces and mixers  
 Service and replacement of TMV in masonry wall  
 Sleeve and apply silicone around pipework passing through holes  
 Test the property's gas pipework for pressure leaks  
 Unpack fixtures/ materials  
 Welding copper tube  
 Welding/ silver soldering copper pipes together  
 Working in open trench

End of Industry Specific: Plumbing

Precast

Joint Caulking

End of Industry Specific: Precast

Rigging

Industrial rope access

Installation of Columns - Using a Crane

Installation of steel cable

End of Industry Specific: Rigging

Roof Tiling

Re-bed tiled roof ridge capping

Carrying mortar in a bucket to work area

Mix mortar in a wheel barrow

Place tile onto mortar bed and trowel off

Replace broken roof tiles  
Repointing of ridge tiles  
Set up mortar bed formwork frame

## End of Industry Specific: Roof Tiling

### Roofing

Apply silicone to joint  
Cleanout gutter by hand  
Creating Roof Penetrations  
Cut Insulated Panel with a circular saw  
Cut metal roof sheets with battery powered shears  
Cut metal roof sheets with electric shears  
Cut metal wall sheets with battery powered shears  
Cutting Roof Sheets with snips  
Fit angles and trims using a battery powered drill and pop rivets  
Form and Flash Roof Penetrations  
Install Box Gutter with saddles straps and gutter board  
Install Pierced Fixed Roof Sheets using a battery powered drill  
Install Stone Sheeting  
Install Temporary Edge Protection  
Install Temporary Edge Protection from an EWP  
Install top hats to steel structure  
Install variable pitch roof ventilators to metal roof  
Installation of Air-Cell Insulation  
Installation of Anchorpoints to existing roof  
Installation of concealed clip roof decking  
Installation of Downpipes  
Installation of Eaves Gutters  
Installation of fascia cladding - From a scaffold  
Installation of fascia cladding - From a scissor lift  
Installation of Flashings using a battery powered drill  
Installation of insulation to roof  
Installation of insulation to walls  
Installation of metal battens  
Installation of metal Fascia  
Installation of Metal Fascias from ladder  
Installation of Rain Water Head  
Installation of Roof Sheets – To Sprung Curved Roof  
Installation of roof vents  
Installation of Roof walkway  
Installation of Safety Mesh from Roof  
Installation of Safety Mesh to roof area - From EWP  
Installation of Safety Mesh to roof area - From Scaffold  
Installation of Safety Mesh to Roof From Roof and Scissor Lift on one side  
Installation of Soffit Sheeting - From EWP  
Installation of Soffit Sheeting - From Scaffold  
Installation of Static line system  
Installation of Support Mesh to walls - Using Scissor Lift  
Installation of Temporary Height Safety System - starting from Scissor  
Installation of Temporary Height Safety System - to Existing roof from Scaffold

Installation of Temporary Height Safety System to new roof

Installation of Temporary Static Line

Installation of top hats to masonry wall

Installation of UPVC Pipe

Installation of vent ridge

Installation of wall sheeting from Ground and Boom Lift

Installation of wall sheeting from Ground and Scaffold

Installation of wall sheeting from Ground and Scissor Lift

Installing External/ Internal Downpipes

Installing Rain Water Heads

Installing Roof Sheets – To Flat Roof Area

Load materials into boom lift

Loading Roof Sheets or materials with Crane

Measure Roofing using temporary Anchor Points

Moving materials over the roof

New-Roofing (Domestic)

Passing up Roof Sheets and Accessories from the ground

Re-fall box gutter

Removal of Asbestos products

Removal of Ceiling Sheets

Removal of Existing (Flat Roof)- Roof Sheeting

Removal of existing Blanket insulation

Removal of existing Box Gutter

Removal of existing ceiling flashings

Removal of existing Ceiling Insulation from open roof

Removal of existing roof flashings

Removal of existing Roof Sheeting and Accesories

Removal of existing roof tiles

Removal of Existing RWH

Removal of materials from roof area by hand - Using EWP

Removal of wall sheeting

Remove and reinstate dektites

Remove and Reinstate Roof Screws

Remove and reinstate Skylight sheeting

Re-Roofing

Roof Plumbing Servicing and Maintenance

Visual Inspection of Structure

#### End of Industry Specific: Roofing

#### Scaffolder

Erecting, Altering and Dismantling Prefabricated Steel Modular Scaffolding

Erection and use of a steel tube scaffold

Erection and use of aluminium tube scaffold

Erection and Use of Mobile Scaffold (Extended Version)

Installation of cantilevered K-Stage Modular Steel Scaffold

Installation of K-Stage Modular Steel Scaffold

#### End of Industry Specific: Scaffolder

#### Seating

Attach platform to wall bracket

Install Drive Motor to Platform Frame

Install end safety rails to Retractable platforms

Installation of Chair Modules

Installation of fixed stadium seating (complete Job)

Installation of fixing brackets to concrete

Installation of Plywood Decks

Installation of retractable stadium seating

#### End of Industry Specific: Seating

#### Shelving and Racking

Assemble Frames and bolt together

Dismantling of Pallet Racking

Install handrails to platform

Install horizontal racking beams from a scissor lift

Install horizontal racking beams from ground

Install staircase assembly using a forklift and lifting jib

Installation of cantilever racking

Installation of Longspan shelving

Installation of Pallet Racking

Installation of Pallet Racking (complete job)

Installation of Static Shelving

Installation of Stock Picking Racking

Level racking and bolt to slab

Manually lower installed rack frames to the ground

Pigeon Hole Rack Assembly (Complete Job)

Remove horizontal racking beams from a scissor lift

Remove horizontal racking beams from ground

Stand up pre-assembled rack frames

Stand up pre-assembled rack frames using a Forklift and Rack Frame Lifting Jib

#### End of Industry Specific: Shelving and Racking

#### Solid Plastering

Chip out loose concrete/ cement or render with scabbling hammer

Clean masonry surface using an electric grinder and cup disc

Mix acrylic render in a bucket using an electric drill

Mixing Adhesive/ Mortar/ Render/ Cement based products with an electric drill

Rendering/ solid plastering

Trowel acrylic render onto surface

#### End of Industry Specific: Solid Plastering

#### Steel Fixer

Cut steel reinforcing using bolt cutters

Place steel reinforcing in footing

#### End of Industry Specific: Steel Fixer

#### Structural Steel

Claim work area on rail line

Cleaning steel using a battery powered grinder with a wire brush attachment

Cleaning steel using an electric grinder with a wire brush attachment

Concrete filling of Columns by bucket

Coring concrete

Crane Set Up

Cutting Steel with an Oxy- Torch

Drill hole using a magnetic drill

## Grout Columns

Inject Epoxy into holes

Install connecting bolts and tension nuts using a battery powered rattle gun

Installation of Ball Tube Handrail

Installation of Chem Anchors onto existing masonry surface

Installation of Chem Anchors onto existing masonry wall

Installation of Columns by hand

Installation of Dynabolts

Installation of Floor Grating

Installation of Girts - Using an EWP

Installation of Hold Down bolts into existing Concrete

Installation of Roof Purlins - Using a Crane

Installation of Steel Members - Using an EWP

Installation of Steel Bracing Members - Using an EWP

Installation of Steel Members - Using a Crane

Installation of Steel members by hand

Installation of Wall plate by Hand

Installing Bolts through existing concrete slab

Land Column into position with Crane

Land Member into position using crane

Lift members into position by hand

Lifting materials using duct lifters

Lifting members using a chain block

Removal of Steel Members by hand using EWP

Tension nuts using a battery powered rattle gun

Welding cleats to existing structure with a portable electric welder

## End of Industry Specific: Structural Steel

### Wall and Ceiling Linings

Cut Drywall using a drywall hand saw

Cut fibre cement sheet using an electric circular fibre cement saw

Cut hole into existing Drywall surface using a key hole Drywall saw

Cut plasterboard using a key hole plasterboard saw

Cut plasterboard using a plasterboard hand saw

Drywall finishing

Flushing to screws and joints in linings

Install fibre cement linings using a battery powered drill

Install suspended ceiling grid

Installation of drywall linings

Installation of insulation Batts to wall and ceiling framing

Installation of plasterboard linings

Installing Cement Sheet Cladding

Manufacture/ build Steel Stud Wall Frames on site

Sanding of finished drywall by hand

Sanding of flushed joints by hand

Sanding of flushed joints using an electric drywall / plasterboard sander

## End of Industry Specific: Wall and Ceiling Linings

### Wall and Floor Tiling

Cut tiles using an angle grinder

Grout tiles

Laying floor tiles  
Laying wall tiles  
Mix adhesive in a bucket using an electric drill  
Mix grout in a bucket using an electric drill  
Mixing cement with a portable electric mixer  
Placing a cement screed  
Remove existing grout between tiles  
Wall and floor tiling to domestic residence  
Wash out bucket

End of Industry Specific: Wall and Floor Tiling

Windows and Doors

Cork joint with Polyurethane sealant  
Install aluminium door frame into existing masonry opening  
Install preassembled window frame into existing opening and screw fix  
Installation of Aluminium Doors and Door Hardware  
Installation of Wooden Doors and Door Hardware using battery powered tools

End of Industry Specific: Windows and Doors

End of Industry Type: Construction

Healthcare & Medical

Aged Care

Dealing with people with dementia or aggression

End of Industry Specific: Aged Care

Homecare

Assist client in and out of a chair

End of Industry Specific: Homecare

Physiotherapy

In home Physiotherapy

End of Industry Specific: Physiotherapy

End of Industry Type: Healthcare & Medical

Hire and Rental

Hire and Rental

Delivery, cleaning and removal of portable toilets

End of Industry Specific: Hire and Rental

End of Industry Type: Hire and Rental

Horticulture

Arboriculture

Clearing and Grubbing Highway (complete job)  
Climb Tree  
Climb Tree to lop branches  
Cut tree using a gasoline powered chainsaw  
Cut tree using a petrol powered chainsaw  
Cut tree using gasoline powered pole saw  
Cut tree using petrol powered pole saw  
Felling of tree from the ground - not requiring a climber  
Felling of tree using Climbing Technique and using wood chipper  
Inspection and use of gasoline powered chainsaw  
Inspection and use of petrol powered chainsaw  
Load stump grinding machine onto trailer using aluminium ramps

Mulching of trees and branches using a Brush/ Wood Chipper  
 Mulching of trees and branches using a Brush/ Wood Chipper (extended version)  
 Put on Harness and set up ropes  
 Safety check and operation of Excavator for clearing and grubbing  
 Safety Inspection and use of Hydraulic Harvester Head attachment  
 Stump Grinding  
 Unload stump grinding machine from trailer using aluminium ramps

End of Industry Specific: Arboriculture

Landscape Horticulture

Clear the area and move existing pot plants  
 Pruning with Hand Pruners/ Shears (Secateurs)  
 Safety Inspection and use of Horizontal Grinder

End of Industry Specific: Landscape Horticulture

Parks and Gardens

Carrying green waste by hand  
 Control of pedestrians through work area  
 Discovery of syringes or needles/ sharps  
 Herbicide Spraying by hand  
 Inspection and use of gasoline powered Brush cutter/ Grass Trimmer  
 Inspection and use of gasoline powered walk behind lawn mower  
 Inspection and use of petrol powered Brushcutter/ Grass Trimmer  
 Inspection and use of petrol powered walk behind lawn mower  
 Inspection and use of skid steer mounted slasher  
 Inspection and use of tractor mounted slasher  
 Load Tractor/ ride on lawnmower onto trailer using aluminium ramps  
 Loading and dragging bags of waste to bin or vehicle  
 Mulching of garden waste using a gasoline powered mulcher  
 Mulching of garden waste using a petrol-powered mulcher  
 Prune branches using hand operated extendable pole pruner or pole saw  
 Spreading fertilizer and manure  
 Spreading mulch by bucketing and spreading with shovel and rake  
 Spreading soil with Shovel and Rake  
 Unload tractor/ ride on lawnmower from trailer using aluminium ramps  
 Working beneath large fig trees  
 Working on sloping/ steep ground  
 Working outside in the sun  
 Working with spikey plants

End of Industry Specific: Parks and Gardens

End of Industry Type: Horticulture

Pest Control

Ant, Insect and spider control

Pesticide spraying by hand

End of Industry Specific: Ant, Insect and spider control

Feral animal control

Aerial Shooting and Baiting from helicopters  
 Automated corral trapping  
 Foot hold trapping  
 Ground Baiting using 1080 poison

## Safety inspection and use of firearms for hunting

### End of Industry Specific: Feral animal control

End of Industry Type: Pest Control

Primary Industries

#### Livestock Grazing

Aerial Mustering

Inspect and Drive Off Road Vehicle/ 4WD

Inspection and use of Tractor

Mustering using Off Road and 4WD vehicles

### End of Industry Specific: Livestock Grazing

End of Industry Type: Primary Industries

Security

#### Security Patrols

Check and Lock down pool area

Check Carpark

Check exterior of premises

Check Gymnasium

Internal Patrols of Student Accommodation

Patrol of Student Accommodation Facility

### End of Industry Specific: Security Patrols

End of Industry Type: Security

Traffic Management

#### Traffic control

Establish a Safe Work Zone-Working on or adjacent road (Traffic Control)

Traffic control in night conditions

Traffic control station set up and operation of traffic control (Stop/ slow bat)

### End of Industry Specific: Traffic control

End of Industry Type: Traffic Management

Transport

#### Truck

Deliver materials to site and unload manually

Delivery and unloading of mobile plant

Driving long distances

Inspect and drive truck

Loading materials onto truck by hand

### End of Industry Specific: Truck

End of Industry Type: Transport

Waste and resource recovery

#### Construction and Demolition

Changeover of skip bin

Delivery of skip bin

Pick up filled skip bin

### End of Industry Specific: Construction and Demolition

#### Liquid waste

Pump out domestic septic tank using a vacuum truck

Pump out grease trap tank using a vacuum truck

Pump out waste milk using a vacuum truck

Removal of liquid waste milk

End of Industry Specific: Liquid waste

Sweepers

Inspection and use of industrial automatic ride on sweeper/scrubber

Inspection and use of Truck Mounted Street Sweeper

End of Industry Specific: Sweepers

End of Industry Type: Waste and resource recovery
